REPORT IN FAVOR OF NICARAGUA ROUTE

Senator Morgan Sharply Criticises the French Promoters of the Panama Scheme---Comment on the Modified Treaty.

By Associated Press.

Washington, Dec. 12. The senate committee on isthmian canals today authorized a favorable report upon Senator Morgan's bill providing for the acquisition from Nicaragua and Costa Rica of the right of way via the Nicaragua route. Senator Morgan later presented this report to the senate, accompanying the return of the bill with a report upon the general subject of a canal across the isthmus. Action on the bill providing for the construction of the canal was deferred.

Senator Morgan's report deals with many questions connected with the construction of the canal, including a thorough inquiry into the attitude of Great Britain upon the subject and the different canal routes. He also discusses the relationship of the Panamerican Canal company to the construction by the United States of a waterway across the isthmus, and while he makes reference to a letter written by President Hutin, of the Panama company, to Secretary of State Hay, he does not give the text of the communication. Mr. Morgan says that the letter to Secretary Hay was dated November 22 last and that it was written after Admiral Walker, as president of the commission, had closed his correspondence with M. Hutin, relating to the sale of the Panama canal. He then adds:

"The letter to Mr. Hay, with the appendixes thereto, and the memoranda that accompanies it, is an attack upon the president of the commission, replete with false assumptions and perversions of fact, and is evidently intended to create a side issue, the design of which is to compel Mr. Hutin will delay, if it does not defeat, the final action of congress in providing for the construction of any canal.

This proceeding and the placing of this correspondence in the hands of the president of the United States by M. Hutin with a request that it be communicated to congress, is but a continuation of the presumptuous and offensive proposition previously made by the Panama Canal company. This company, in a previous administration, had succeeded in obtaining the resignation of a secretary of the navy to accept a nominal position in their service at a large salary and expended $1,500,000 in New York, chiefly in acquiring the aid of the leading business houses in promoting the De Lesseps plan without a dollar of stock being subscribed in that city.

The desperate financial straits of the new Panama Canal company compelled them to make overtures to the United States to unload their enterprise on the United States, and their agents became accordingly aggressive in this effort."

The report then proceeds to quote [illegible] of communications from [illegible] Hutin and his attorneys to officers of this government, in 1899 and 1899, which have heretofore been printed. After quoting a letter from Sullivan & Cromwell, attorneys for the Panamerican Canal company, directed to the president and dated April 30, 1900, in which they ask the president to advise congress of the attitude of the Panamerican company, the report says:

"The manifest purpose of this company to interfere with legislation by asking the president to inform congress of a state of facts, as alleged, of which congress is presumably without knowledge, is an insult to the intelligence of congress. It is an insolent invitation to the president to control the action of congress so that they shall not act upon bills reported by committees in both houses."

Senator Morgan again refers to the letter to Secretary Hay of last November, saying that M. Hutin previously had made an unmistakable proposal to sell the Panama property to the United States and adding: "Let M. Hutin in his correspondence with Admiral Walker and his letter and the accompanying memorandum sent to Mr. Hay first assumes and then states and argues and finally insists that the United States offered to purchase their property and that when the company agreed to sell it the isthmian canal commission refused to enter into a scheme of arbitration to ascertain the value of it. He imputes bad faith to the commission and severely criticises their dealings with the canal company."

Proceeding, the report says that Admiral Walker did nothing more than ask legitimate questions of M. Hutin and that there was in them no intimation of a proposition to purchase. In this connection Admiral Walker's letter of October 22 last to M. Hutin is published, and of this Senator Morgan says, "It utterly breaks down the pretension of M. Hutin that the United States through Admiral Walker was engaged in the effort to purchase the property of the Panama canal.

He adds that this letter dispels every possible criticism of Admiral Walker and the commission of which he is president. This letter the report accuses M. Hutin of failing to send to the president. The conclusion with reference to this point of the controversy is set forth in the following language:

"The motive for this unseemly and unprecedented conduct must be either that this canal company is desperate in its purpose to unload its property upon the United States because the French stockholders have lost faith in its success or that it is endeavoring to prevent the competition of any canal with its Panama railroad, the shares of which they value at $500---the face value being $100 per share, on account of its enormous earnings."

The introductory pages of the report contain a general review of the importance of the construction of an isthmian canal and in the second paragraph of the report it is declared that "the failure to accomplish this work would create a feeling of national despair."

Contending for the importance of the enterprise Senator Morgan urges that no nation nor any combination of private interests can have any right to prevent its consummation. "There remains," he says, "but one barrier to the union of the Atlantic and Pacific seas and no one nation has the right to declare that it never shall be removed except with its consent."

He attributes the failure to construct the canal in the past to the attitude of other nations, saying:

"For the past 50 years the power and influence of the British government aided by combinations in the United States and France has defeated all efforts to open an American isthmian canal."

Continuing on this line, he says:

"An antagonism which is an imperial policy of Great Britain in the beginning has become a plan for gathering wealth by levying tolls upon the commerce of America and its strength of purpose will increase until some more powerful and just inducement will lead Great Britain to relax her grasp and permit us to take care of our country. The combinations at home and in France that have assisted in suppressing the demands of our industrial classes for a canal to connect the great oceans are chiefly the transcontinental railways in Canada and in Panama and those in the United States---eight great corporations that now control almost the entire transportation service between the oceans that wash the coasts of the western hemisphere."

In further discussing the attitude of Great Britain, Senator Morgan says:

"The scope and purpose of the Clayton-Bulwer treaty, as it was declared by Lord John Russell, made it the instrument of injustice and repression to Nicaragua, Costa Rica and other Central American states that has deprived them and all Christendom of the benefits of an American inter-oceanic canal for more than half a century. In view of these facts, it is clear an overruling necessity of imperial, commercial and military policy connected with her policy to the Suez canal forced Great Britain to adhere to the Clayton-Bulwer treaty, as a means of preventing the construction of a canal through Nicaragua by the United States while she would continue to hold the vantage ground of occupation and increasing authorities in the territories of Nicaragua and Honduras which she had agreed to abandon. Her intention to control both canals was then evidently fixed." He asserts that Great Britain's control of the Mosquito coast was used as a pretense to hold us until she had accomplished her great policy relating to the Suez canal.

"We were," he said, "held to the leash by British rulers until they could accomplish the control of the Suez canal."

He contends that Great Britain's policy from the beginning was simply a policy of delay and that both powers have abandoned the policy of the Clayton-Bulwer treaty, which [illegible] remains "but an empty diplomatic technicality, which must yield to the reasonable demands of the United States, Nicaragua and Costa Rica for their own safety and prosperity, and to the demands of the world for a gateway in Nicaragua to correspond with that opened at Suez." He declares that if diplomatic effort to rid the world of the baneful domination of the Clayton-Bulwer treaty fails, congress should abrogate it.

The major portion of the report was made before the new Hay-Pauncefote treaty had been promulgated, but in an appendix the following reference is made to that treaty:

"If two-thirds of the senate shall concur with the government of Great Britain in establishing an effective basis on which a canal for ships through the American isthmus shall be operated, for the security and benefit of all nations, such agreement may well be considered as an advanced step in a true civilization, honorable to both governments and rich in blessings to mankind.

"It is a new alignment as to the rights, privilege and powers of the United States touching the ownership and control of an isthmian canal based on the general principle of the freedom and neutrality of such a canal that is declared in the Clayton-Bulwer treaty, and is in accord with our well-established national policy, often declared and never denied by the United States.

"Whatever sacrifice it may involve in benefits that might be otherwise claimed as being exclusive in favor of the United States in the absence of such an agreement for the benefit of all nations, the American people approve the spirit of this agreement and will adhere to it as an additional evidence of their friendly sentiment toward all people who compete with them honorably for the increase of the facilities of commerce, and for the extension of good will to all the world."

Senator Perkins made the assertion that by the acquisition or control of a strip of territory through which the canal would pass the United States would acquire rights which would subject that territory to our coastwise laws and said foreign bottoms could not trade between ports of the United States and any portion of the territory through which the canal was built. This view was combatted to a certain extent by Senators Tillman and Bacon, the former intimating that if that were true, relative to the United States, Great Britain, on account of her Canadian possession, and Mexico, both extending from ocean to ocean, also could contend for similar privileges. This he thought, also would be true of any South American country whose territory extends from ocean to ocean.

Senator Spooner was decidedly of a contrary opinion.

The senator also contended that the United States would have a right to control the canal after its own manner during any war to which this country might be a party. Senator Mason interjected that treaty agreement never binds a nation to the extinction of its military rights and duties. Senator Spooner assented to this, and said that, no matter what might be the provisions of the treaty, the nation could not be accused of dishonor or immorality if its terms were broken in defense of its own existence.

SENATE WILL VOTE ON TREATY NEXT MONDAY

By Associated Press.

Washington, Dec. 12. The senate acted today to take a vote before adjournment on Monday on the new Hay-Pauncefote treaty for the abrogation of the Clayton-Bulwer treaty and opening the way for the construction of a canal across the isthmus of Panama by the United States. This agreement was reached after four hours' debate sufficiently interesting to insure the constant attention of most of the senators.

Senator Spooner, who was one of the principal speakers of the day, had just concluded when Senator Lodge made an effort to secure a vote. It developed there were other senators who desired to be heard, the result being that the date for the vote was postponed until Monday.

The agreement provides for an adjournment of the senate from today until Monday and for a meeting at 11 o'clock on that day, one hour in advance of the usual time. The understanding is that as soon as practicable after the senate convenes Senator Lodge shall move an executive session and that the treaty shall have the entire attention of the senate until a final vote is reached before the adjournment for that day.

The principal speakers today, besides Senator Spooner, were Senator Money and Senator Foraker. Mr. Money, while finding much in the treaty to criticise, said that as he found the fortunes of the proposed canal across the isthmus inextricably intertwined with the treaty he could not see his way clear to do anything that would prevent or even delay ratification. The particular features of the new treaty with which he found fault were those retaining the neutralization provision of the Clayton-Bulwer convention and specifying police control of the canal when built. He argued that the effect of these provisions inevitably must be to limit and prescribe the power of the United States to control its own property in case of war.

Senator Foraker maintained that provisions of the new treaty meet every objection made to the original Hay-Pauncefote treaty and cover every essential thing that was included in the amendments made by the senate to that document.

Senator Foraker was frequently interrupted by Senator Bacon. In the course of one of these interruptions Mr. Bacon asked if it was not true that under the terms of the treaty the construction of fortifications by the United States would be an act of war. Mr. Foraker replied in the negative.

Senator Spooner, who followed, also was frequently interrupted by senators on the Democratic side. Senator Spooner insisted that the government of the United States could not be bound by any treaty agreement which would prevent this country defending its own property in its own way in time of war.

A very important question was raised by a number of senators on the Democratic side as to the right of the United States to give differential rates to vessels engaged in our constwise trade. This matter brought other senators from the Republican side into the controversy. Senators Perkins and Nelson were among those who contributed to this feature of the controversy. Senator Nelson insisted that under existing law the United States would have a perfect right to give to the constwise trade of this country any benefit it might see proper. It was perfectly well understood, he said, that the ships of a foreign nation could not do a constwise business and Great Britain had made the treaty with the full knowledge of this fact.

THOS. RICE HAD A NARROW ESCAPE

Came Near Spending a Night in the Open Air Near Lake Moraine---Would Have Been Frozen.

While ascending Pikes Peak during a blinding snow storm Tuesday night, Thomas Rice, caretaker of the city reservoir at Lake Moraine, was almost frozen to death. Mr. Rice fell while making his way home and was unable to walk for some time as a result of the fall. He finally managed to reach home in an exhausted condition.

During the storm on the Peak Tuesday afternoon a break occurred in the telephone line, which runs up the mountain to Lake Moraine. Mr. Rice went out about dark to repair the break. He was trying to find the break when the accident occurred. He slipped on some aspen boughs and fell heavily.

Mr. Rice lay partly unconscious for a time after the fall, as he was injured internally. When he regained his senses he found that he was unable to walk. It was below zero on the Peak that night, and Mr. Rice realized that if he could not get home he would freeze to death. He was only a mile from his home, and gathering together all his energy he managed to crawl for some distance. He became stronger with the exercise and finally was able to walk a little distance at a time. He was almost dead with cold and exhaustion when he reached the house.

Word was sent to Colorado Springs Wednesday and a physician went up to Lake Moraine and attended to Mr. Rice's injuries. He will recover.

EVIDENCE COMPLETED IN THE DOYLE DEFENSE

By Associated Press.

Council Bluffs, Ia., Dec. 12.---After the examination of nine witnesses today the defense in the famous suit of James Doyle to recover a million dollars worth of stock in the Portland Mining company declares its evidence finished. It was 4 o'clock when the first witness left the stand, and at request of counsel for the plaintiff Judge Green adjourned court until tomorrow. Doyle will offer his rebuttal evidence tomorrow and the case will then be ready for argument, which will probably be Monday. The trial has occupied the attention of the court for ten weeks and Judge Greene today signified a desire that it might be hastened as much as possible. It is thought it will go to the jury about the middle of next week.

Miss Kate Burns and Mrs. M. A. Peck, sisters of James Burns, the defendant in the Portland mining suit, were on the stand this morning. Mrs. Peck testified with regard to the arrangement by which Doyle was to go to Cripple Creek as a partner with Burns. She said Doyle protested against a partnership and said he would locate a claim for himself.

Miss Kate Burns stated that she had at Doyle's request, some of the stock in the Portland carried in her name, but that she had never personally participated in the benefits, and had permitted the use of her name in order to protect Doyle.

John Harnan said he was present when the purchase of Burns' claims were made by the Portland company but Doyle did not at that time make a claim for any share in them.

James Mullen, who was formerly a deputy sheriff in Colorado Springs, testified that he visited the Tidal Wave in January, 1892, and that the discovery stake bore the name of James F. Burns.

Burns was recalled by Doyle's attorneys for further cross-examination and identified an account book demanded a few days ago by Doyle's attorneys. The book shows that Doyle was employed by Burns on the Tidal Wave claim during February and March, 1892, and that he was paid for his services. Doyle's attorneys laid stress on the fact that the book contradicted evidence already given that Doyle did not work on that claim. The explanation given by Burns was that the evidence given referred to work as a partner and part owner. Additional legal papers from the files from the Colorado courts were produced to show that Burns had repeatedly sworn to the declaration that Doyle was the discoverer of the Portland claim.

Frank G. Peck was recalled and testified that there had been deep animosity between Doyle and Burns and that it was especially bitter in 1897, when the purchase of Burns' claims was made by the Portland company. This finished the evidence offered for the defense and Doyle will present his rebuttal evidence tomorrow.

G. A. R. ENCAMPMENT GOES TO WASHINGTON

By Associated Press.

Chicago, Dec. 12. Members of the executive council of the National council of the G. A. R. at a meeting here tonight decided to hold the next annual encampment of the organization at Washington, D. C. It has been decided that the encampment will be held in the fall although the exact date will not be selected until tomorrow.

Atlantic City, N. J., and Denver wanted the meeting, but after the appeals of the three delegates had been heard the national capital was selected unanimously. Among the things mentioned in favor of that city was that the monument in memory of General William T. Sherman, which is being erected in that city, will be ready for dedication during the time of the encampment.

SENATE COMMITTEE ON COMMERCE

By Associated Press.

Washington, Dec. 12.---The senate committee on commerce held a meeting today for the purpose of organizing its sub-committees and referring to them the bills which have reached the committee. The most important change made in the sub-committees was the substitution of Senator Berry as chairman of the sub-committee on bridges for Senator Vest. This position has been held by Senator Vest for a great many years but was voluntarily surrendered by him on account of his health. The shipping bill was referred to the sub-committee on ships and shipping of which Senator Frye is chairman, and of which Senator Hanna is a member. The measure was not discussed. There are two bills before the committee for the establishment of an executive department of the government to be known as the department of commerce, and these were referred to a special sub-committee consisting of Senators Nelson, Hanna and Clay. The bill for the reorganization of the revenue cutter service was given to a special sub-committee consisting of Senators Gallinger, Penrose and Turner.

MIDLAND ELECTION

Special to the Gazette.

New York, Dec. 12.---The directors of the Colorado Midland Railway company met here today and elected these officers for the ensuing year: President, Frank Trumbull; vice president, George W. Kramer; treasurer, H. B. Henson; secretary, Harry Bronner.

SCHLEY COURT WILL SOON SUBMIT REPORT

By Associated Press.

Washington, Dec. 12. The Schley court of inquiry is nearing the end of its labors, and while it is impossible to secure from the members or from the navy department a statement as to when the report will be submitted, it is believed that it cannot be delayed much more than 24 hours. It was said at the department this afternoon that at the close of office hours the report was not finished. It is the intention of Secretary Long to have typewritten copies of it prepared immediately for the press.

Although satisfied with reviewing authority Secretary Long has said that he will not exercise it in this case. The report will be given to the public without the slightest change and without any indorsement in the nature of a review of the proceedings. The court recalled Watson today, although Admiral Dewey did not attend the afternoon session.

Captain Lemly, the judge advocate of the court, has paid a visit to the court room this morning and carried away some papers, which, while connected with the case, were not the report of the case.

INDICTMENT FOR ELECTION FRAUD

Special to the Gazette.

Denver, Dec. 12.---The special grand jury has returned one indictment in connection with frauds in the recent election. No warrant has yet been served and it is impossible at this time to state who is the indicted party.

WHY MRS. WOLCOTT WAS ENTERTAINED

Special to the Gazette.

Washington, Dec. 12. Washington society is greatly interested in the significance attaching to the entertainment of Mrs. Wolcott at the White house. Two sets of reports have been started with reference to it. One is that the president does not approve of ex-Senator Wolcott and has taken this method of showing it. The other is that President and Mrs. Roosevelt are trying to bring about a reconciliation between ex-Senator Wolcott and his former wife. The last theory is discredited upon the ground that the president would scarcely care to engage in the work of reconciling divorced people. The strong probabilities are that the only significance attaching to the incident is that the Roosevelts were simply courteously reciprocating social favors extended to them in the past by Mrs. Wolcott, who has just returned from an extended trip abroad.

STORM IS GENERAL THROUGHOUT THE STATE

By Associated Press.

Denver, Dec. 12.---Special dispatches from various portions of the state indicate that the blizzard that has been raging around Denver for the past three days is general as far as Colorado is concerned. It also reaches into Wyoming. The snow fall has been quite heavy in the northern portions of the state and in the mountains. Fort Collins reports 12 inches, Windsor 14, Loveland 8, Eldora 18 and Salida 14. At La Junta the snow is only an inch in depth but the mercury is reported at zero. The same temperature is reported at Sterling with about eight inches of snow. At Greeley the snow is nine inches deep. The snow fall in Denver has been about six inches and the temperature was 10 degrees above zero at 6 o'clock.

COMMITTE REPORTS ON PHILIPPINE TARIFF

By Associated Press.

Washington, Dec. 12. Chairman Payne of the Ways and Means committee and Mr. Richardson of Tennessee, the ranking Democrat of the committee were engaged today in preparing the majority and minority reports, respectively, on the Philippine tariff bill. Mr. Payne's report will not be of an argumentative character and will be confined to an explanation of the new bill. The need of revenue for the islands, because of the extensive work of development and the establishment of schools, is set forth. The minority report promises to be quite extensive, taking up the general subjects of colonial policy, imperialism and protection.

CHILE AND ARGENTINA

Reports From Buenos Ayres Say Relations Are Strained.

CHILE IS BUYING WARSHIPS

Argentine Government Is Well Prepared Financially for any Trouble ---Mobilizing Militia.

By Associated Press.

Buenos Ayres, Friday, Dec. 13, Via Galveston. The relations between Chile and the Argentine republic are strained. Chile has not yet replied to the demand for the construction of strategic roads in the litigated territory. The Chilean answer to this demand will be given tomorrow. The Argentine government believes that the Chilean answer will be satisfactory but a part of the press doubts this. In the meantime both countries are taking protective measures, although Argentine has not yet mobilized the militia.

In case Chile's answer is not favorable, Argentine will withdraw her minister from Santiago de Chile, and the antecedents and history of the misunderstanding will be forwarded to Great Britain for arbitration.

Chile is busily engaged in buying warships, aiming to surpass the power of Argentine's fleet.

Commercial circles here hope that the influence of the pope will prevent a conflict of arms between the two countries. Calm reigns here. There have been no warlike manifestations but all parties are united in support of the government. The Argentine and foreign newspapers published here unanimously counsel the Argentine government to maintain its present energetic attitude.

The Argentine government deposited £2,100,000 in London yesterday to insure the payment of the coupons of the Argentine debt. The Argentine government possesses another reserve fund of £12,000,000.

The bourse of Buenos Ayres is but very slightly disturbed.

A decree ordering the mobilization of the reserves of 1878 and 1879 on January 1 has been issued. These reserves number 60,000 men.

The chamber in secret session has voted the credits necessary for the mobilization of the militia.

FEDERATION OF LABOR AND THE NEGRO PROBLEM

By Associated Press.

Scranton, Pa., Dec. 12.---Much life was infused in today's proceedings of the convention of the American Federation of Labor. The negro problem in the south as far as it related to unionism was unexpectedly injected into the proceedings and the long-standing conflict between the Socialists and Trade unionists promised to monopolize the attention of the delegates had the Socialists replied to [illegible]

The questions of organizing common laborers into a national union and of throwing out of unions all organizations allied with city, state, national or international unions if they refuse to affiliate with the Federation of Labor, were also vigorously debated.

The Socialist incident came up at the morning session, during the discussion of a committee report indorsing most of the recommendations contained in President Gompers annual report. D. A. Hayes of Philadelphia, national president of the Glass Bottle Blowers, and Max Hayes of the Cleveland Central Labor union, the well-known Socialist, made speeches strongly urging the enforcement of laws prohibiting child labor. The latter during his remarks read a long list of decisions rendered by federal and state courts against organized labor. A motion to have the list printed in the minutes brought President Gompers who was not in the chair at the time, to his feet and the delegates were treated to a three-minute passionate speech. He said it was unfair to incorporate the list in the minutes in that way and suggested that a list of the trade union victories should be printed along with it. He concluded by denouncing the attempt to show that trade unionism is a failure and characterized it as an outrage. A wave of applause swept over the convention as Mr. Gompers took his seat. The motion was defeated after W. B. Wilson of the miners had spoken along the same lines as Mr. Gompers and the recommendations of the president were adopted except the one referring to the general defense fund. The committee's suggestion that the fund be raised by national and labor unions instead of by the American Federation of Labor was adopted.

The negro question came up when the committee on law reported a resolution compelling all local unions affiliated with the federation to join the central labor bodies in their respective localities, made the point that the federation last week in deciding a contested seat where the color line was brought into question had authorized the creation of a separate central union in Richmond for colored workmen. The resolution was debated for more than an hour by many delegates. Charles C. Eckard, of the Anniston, Ala., Trades Council, made the principal speech in opposition to the resolution. He said the proposition would compel white unions to take in negroes, and if adopted by the convention 99 per cent of the unions south of Mason and Dixon's line would secede from the federation. He declared the people of the north did not understand the negro problem. His remarks had some influence on the delegates, and the resolution on [illegible] committee on law was defeated.

Two resolutions were reported on the question of organizing the common laborers into large unions and both were recommended to be sent to the executive council with instructions for that body to take up the matter and report at the next convention. This action was taken.

The Pacific coast delegates fought among themselves the proposition to drop all unions from state, national or international unions unless they join the American Federation of Labor. The measure was particularly aimed at the San Francisco Building Trades which is at odds with the Central Labor union of that city. The committee on law recommended that the matter be dropped on the ground that such a step would be unwise and the convention adopted the recommendation.

It was decided that hereafter the annual convention of the federation shall be held on the second Thursday of November of each year. J. H. Bowman of Chicago, presented a resolution instructing the president of the federation to protest against the confirmation by the United States senate of the appointment of Frank E. Baker as United States circuit court judge in Indiana. The reason for the protest is that Baker is a son of Judge John H. Baker of Indianapolis, who had granted injunctions against union workmen. Among the resolutions that were adopted were these:

That legislatures be petitioned to enact a law to compel the constructors of machinery to cover all dangerous parts in such a way as to protect employes working around machinery.

That no boycott should be declared until central labor unions have investigated the disputes and endeavored to effect an amicable settlement.

That the government officials enforce the eight-hour law on all government work in private ship yards.

Resolutions proposing changes regarding the election of officers and chairmen of committees were defeated as was also a resolution proposing a national defense fund for benefit of strikers.

The special committee on autonomy and the committee having charge of the socialistic resolutions were in session and each side will probably make its report tomorrow.

WILL FIGHT

ROURKE, OF OMAHA, STILL OPPOSES HICKEY.

He Owns the Omaha Franchise in Hickey's League and Will Insist on Running That City's Baseball.

By Associated Press.

Omaha, Dec. 12.---William Rourke, owner of the Western league baseball club in this city, says he will fight any effort of Thomas J. Hickey to place an American association club in Omaha. Rourke said today that he owned the franchise for the American association club in Omaha and has deposited a forfeit of $500 to protect his interests. He intimated that should Hickey attempt to place a club he will resort at once to injunction proceedings.

THE DENVER FRANCHISE

BASEBALL FANS IN THE CAPITAL CITY STILL IN THE AIR.

Syndicate Is Being Formed to Get the Club and Floto's Project Stands---Keith Turns Hickey Down.

Western league baseball matters are still attracting considerable attention. Mr. Tebeau, otherwise known as "White Wings," is in Denver trying to get something out of the franchise which D. C. Packard sold him. The league will not recognize the sale and Tebeau will not be taken back into the league.

A syndicate is now being formed, according to late reports, for the purpose of getting the Denver franchise. Tebeau and Packard are supposed to be backing the new syndicate and Bert Davis is said to be scheduled for manager. The Floto request for a franchise is still before the league and Floto has good backing. It will be a hot fight for the franchise and Tebeau's connection with the syndicate is liable to queer Bert Davis' chances for managerial honors. Bert is a good baseball man and would probably do the square thing by Denver, but with Tebeau in the background, Denver fans will do well to look askance at the new syndicate.

Buchanan Keith has been offered an Omaha franchise in Hickey's new league but he has respectfully declined the honor. He says two teams there won't pay and he recognizes that Rourke has the inside track. Keith is too much of a baseball man to follow in Hickey's disastrous wake.

MRS. ROOSEVELT TO HOLD A RECEPTION

By Associated Press.

Washington, Dec. 12. Mrs. Roosevelt will hold a public reception for ladies on Saturday, the 14th inst. from 3 to 6 p. m. She will be assisted by the ladies of the cabinet and will have with her during the reception a number of young ladies, including those of the cabinet circle.

This will be the first of the public receptions by the mistress of the White House since the Cleveland administration.

25 cents to Cripple Creek by the Colorado Midland railway.

STORY BOOKS FOR CHILDREN

Lithographed paper covered juvenile books Little Red Riding Hood, Mother Hubbard, Sleeping Beauty, A, B, C, Jack and the Bean Stalk, Blue Beard etc. 9c

Books like above, only much larger as Bible Stories, Little Tots, Cinderella, Mother Goose, Animals, Kris Kringle, etc. 15c

NEWS NOTES FROM DENVER

Big Reduction in Freight Rates From Chicago--Colorado Rate War.

Denver Bureau
Colorado Springs Gazette

Denver, Dec. 12.—Elsie Coltrin and Pearl Williamson, the two girls who were reported as lost from their homes in this city yesterday, were found and detained in Loveland today. Two youths, F. W. Holling and L. S. Hamilton, for whom they left home, have been arrested, charged with abducting the girls. All four. Rumors of a slash in freight rates have been current for some time and today

QUAINT PHILOSOPHY
In An Advertisement.

When a man acts as he believes the infinite within him would have him act, he draws power to himself from unseen sources; that power may be shown in many ways.

Things work smoother; plans carry out, people begin to say "lucky;" "he's a winner;" "everything he touches succeeds," etc., etc.

Ever try it? If you ever do, you will agree that it is the greatest proposition on earth.

There is a marvelous potency behind the man who acts in a simple, straightforward way, as near as he knows, in accordance with the promptings of that invisible deity within.

This should teach him that great and honorable work is ahead; man at once the tool and a part of the master workman.

The tool must not be dulled and ruined by bad food, tobacco, whisky, coffee, etc. You question including coffee among "bad habits." None of these habits are bad habits unless they weaken or lessen the clear cut power of the individual. If they do, quit them. If food and drink are not well selected, change. Put your machine in clean, first-class shape. It is the purpose of this article to suggest a way to keep the body well so it can carry out the behest of the mind.

A sure and safe start in the right direction is to adopt Grape-Nuts Food for every morning's breakfast. It is delicious, pre-digested, highly nourishing, and will put one fine along toward doing his best in life's work.

Follow this with abandonment of coffee. If it does not agree with you, and take in place of it, Postum Cereal Food Coffee, for its regenerating and vitalizing nourishment.

With a wise selection of food and drink, man can quickly place himself in shape where the marvelous Directing Power will use him for some good and worthy purpose.

Sense, just plain, common sense.

will be returned to the city tomorrow.

The rate cutting of railroads between Denver and the east has begun in earnest. All lines running to Chicago have cut the tariff rate of 7 cents on fifth-class freight to 5 cents. Practically all of the rates in carload lots have been diminished 40 per cent of the published tariff. As a result the Denver merchants are buying promptly and heavily. It is estimated that within the next three weeks 1,000 carloads of merchandise will be received where, had the rates remained firm, the same number of cars would not have been received before the first of March. One jobber today placed orders for 60 carloads of goods and another for 100 carloads.

So far the roads leading out of Denver have refused to join in the rate war that is going on between the Springs and Cripple Creek. However, the Denver jobbers are beginning to feel the loss of the Cripple Creek trade, as a large portion of it is being captured by the Colorado Springs houses.

The newsboys and poor children of Denver will certainly enjoy a merry Christmas. Already two dinners have been provided for them, and today the Evening Times announces that it will give the boys a dinner at the St. James hotel, followed by a newsboys' party at one of the theaters. It will also give to each boy a fur cap for the winter.

Colorado has been asked to furnish her quota of Rough Riders for the International Olympic games which are to be held in Chicago in 1904. John W. Springer, Charles F. Martin and J. M. Kuykendall, who are attending the National Live Stock association in Chicago, will have charge of securing the Colorado contestants. These games will be in the nature of athletic contests between representatives of all nations. The United States will supply her Rough Riders from the territory west of the Missouri.

Mr. Nesbit, commissioner of supplies for the city, has evolved a scheme whereby he thinks considerable money can be raised from the old fire bell which hung in the city hall and which fell during the recent fire. His idea is to cast the metal in the bell into numerous small bells to be about the size of a watch charm, and sell these as souvenirs of the early history of Denver. He says 10,000 charms could be made from the old bell.

The motion of the indicted bribery defendants for a change of venue will be argued before Judge Johnson tomorrow morning in the West Side court. A. B. Seaman will represent the four men under indictment, while Ralph Talbot and Robert Pitkin will represent the state.

Burglaries continue unabated in this city. The latest report, and one that has been suppressed for a few days, is that the conservatory of music at Fourteenth and Arapahoe streets, within two blocks of the police station, has been entered three times in the last three days and a number of valuable articles secured.

The snow storm which struck Denver yesterday morning continued all last night and today. Tonight it is still snowing and is very cold. Predictions are that the snow will cease and that tomorrow will be clear and cold. No wind has accompanied the storm, and as a result very little trouble is experienced in traveling. The snow this evening is about five inches deep on the level and is very light. Should the wind rise, the cuts will become filled, and it is feared that in many places traffic will be delayed. The railroads have their lines well supplied with snow plows and all efforts possible are being made to prevent a blockade. Locally, the snow has been more of a blessing than anything else, as it has completely settled the dust which has been such a nuisance the past three months. Local public utilities companies have experienced very little delay on account of the storm. Reports indicate that the snow extends over the eastern part of the state and also from Palmer Lake to Cheyenne on the first range. The extreme southern part of the state reports heavy rains. Other portions report light falls of either rain or snow.

A report from Greeley says: "The business people of the city and farmers in this vicinity are very much interested in a petition being circulated by C. W. Beer and others, asking that the city council grant them a franchise to build an electric railway in Greeley to connect Greeley with outlying districts and afford a time and labor saver in bringing farm products to market. The promoters of the project have more than a million dollars at their disposal and as soon as the franchise is granted, will take immediate steps to construct the road.

Governor Orman today sent out the following telegram to the committee of Denver men now in Chicago striving to secure the Grand Army encampment for Denver next year.

"Denver, Colo., Dec. 12, 1901.

"Col. M. S. Hollister and Hon. C. F. Wilson, Chicago:

"On behalf of all the people of the great state of Colorado, I extend to you a most cordial welcome to hold your national G. A. R. encampment in Denver next year.

"James B. Orman, Governor."

Russel Harding, vice president and general manager of the Missouri Pacific, Iron Mountain and Denver & Rio Grande railway systems, arrived in the city this morning on a tour of inspection of the roads of which he is manager. Mr. Harding met J. M. Herbert, local manager of the Rio Grande, and the two will take a lengthy trip over that road. One of the places to be inspected will be the yards at Pueblo, and it is believed that the question as to what amount of money shall be spent on them will be definitely settled at this meeting.

Frank P. and George Wynn, sons of the late C. W. Wynn, arrived in Denver this morning. They come here for the purpose of making a final investigation concerning their father's reported discovery of a new process for extracting gold. They will confer with the local promoters of the scheme and it will be definitely settled as to whether the work will be carried on or not. The boys learned of their father's death in a peculiar manner. Frank is a telegraph operator in Chicago and one day last week transmitted a message from a local man to a postmaster in North Carolina, asking for the whereabouts of the family. Thinking that something might have happened to his father, he answered the message, which resulted in the two boys coming to Denver. The boys state that their father has been working on what is known as the Wynn process for over 20 years.

We Have Them.

CANON CITY

(Special Correspondence.)

Canon City, Dec. 11. The new concentrating plant of the Copper King Mining company six miles south of Canon City, is nearing completion. Two carloads of machinery arrived from Denver yesterday and are being placed in the machinery building today which is now completed. The machinery is to be run by electric power, which will be furnished by the Colorado Electric Power company. These people now have the poles in all the way to the mine. Ever since the mine opened up the company has been hampered for the want of water, but now at the depth of 366 feet in the shaft, they have struck a bed of water sufficient to meet all requirements. Ore in the mine is improving with depth. C. B. Phay is a most efficient manager and pushing the work of development rapidly.

The Isabel mine at Tuclamur has been sold to Boston capitalists. They are also now installing steam drills and will shortly erect a concentrator on the property. The Isabel ore carries values in gold, silver, lead and copper and has been sufficiently tested to warrant the owners to put in such valuable machinery. Some other properties are being developed in this vicinity. The vigorous development being carried on at Parkdale, Tuclamur and Dawson should soon put Fremont county away up in the ranks of the precious metal producing counties.

The Fremont County Horticultural society is endeavoring to have a farmers institute held in Canon City at some date in January.

Mr. and Mrs. Clyde Dawson entertained the Young Married People's Card club on Friday evening and a most enjoyable evening was spent. Dr. Little and Miss Amy Smith won the prizes.

Frank L. Smith, the dry goods merchant, has engaged the services of Frank Lockhart as assistant manager. Mr. Lockhart is a specialist in his line.

Mr. and Mrs. Lyman Robinson have returned from their eastern tour.

Mr. and Mrs. L. F. Hovey have come to Canon City from Florence to remain some months. Mr. Hovey has the contract to install the new sewer system here and work must be commenced on or before the 13th inst., to comply with the contract.

There is a movement on foot looking towards the consolidation of Canon City and South Canon in one municipality. The best business men in both places advocate the union and a meeting of the respective boards of aldermen will probably be arranged to go into the matter.

It has been ascertained recently, from some of the most accurate and exhaustive tests that the sugar beets grown in the Arkansas valley and especially in the vicinity of Canon City, exceed in the percentage of sugar those grown almost anywhere else. In fact here they have been grown of an average of sugar of 25 to 30 per cent., whereas in the European countries 12 to 18 per cent. is the average.

Warden Martin of the state penitentiary, is making a great many most excellent improvements. The fine residence lately erected for the deputy warden is a handsome addition to Canon City real estate and to the state buildings.

Many delays have occurred to hinder the completion of the new Presbyterian church. It should have been finished before this and was expected to be, but present indications are that it will be well into January before the work is completed. The church will be one of the finest in the state and a decided credit to the town, the Presbyterians, and the people who built it. The present edifice has been purchased by the Ladies Library committee for a public library.

Mrs. C. W. Burrage has just donated $50 worth of high class books to the library committee.

ANNUAL MEETING OF THE SANTA FE

By Associated Press.

Topeka, Kan., Dec. 12. At the annual meeting of the stockholders of the Atchison, Topeka & Santa Fe railway, 19 directors were present and voted stock and proxies representing 1,861,635 shares of stock out of a total of 2,161,998 shares. The three old directors were re-elected. They are George G. Haven of New York, Benjamin B. Cheney of Boston, and John G. McCullough of New York. The purchase of various lines of road during the past year which was negotiated by the directors was ratified.

At the close of the stockholders' meeting the annual meeting of the directors occurred. President Ripley and all the other officials were re-elected without division.

The following directors were present at both meetings:

Edward D. Ripley, Chicago; Thomas P. Fowler, New York; Victor Morawetz, New York; Edward J. Berwind, New York; R. Somers Hayes, New York; G. G. Haven, New York; John R. McCullough, New York; Benjamin B. Cheney, Boston, and Charles S. Gleed of Topeka.

President Ripley and a number of the directors left for Beaumont, Texas, late this afternoon.

CRIPPLE CREEK NEWS NOTES

Genuine Winter Weather Welcomed--Democrats Will Decide on Division of Spoils.

Cripple Creek Bureau Colorado Springs Gazette

Cripple Creek, Dec. 12. Genuine winter weather is now prevailing in the districts. About five inches of snow fell during the early morning and tonight the thermometer registers lower than it has at any time previous during this winter. There is good sleighing and during the day and this evening a number of people enjoyed it. Bennett avenue, the main thoroughfare of Cripple Creek, is in the best possible condition for this sport. At Union park there is good ice skating and quite a number are taking advantage of it. The fall of snow and the cold weather are appreciated by many for the reason that it will have a tendency to check any contagious diseases that might prevail. Merchants are happy because as they say cold weather stimulates trade. The Democratic candidates-elect and the executive committee of the party will hold what promises to be a very interesting meeting tomorrow night in the county court room. The purpose of the meeting is for the selection of officers to fill the minor positions in the county offices. While several of the candidates will make no changes of any importance, owing to the fact that they have been re-elected, still there will be quite a few vacancies.

Masonic lodge No. 110, A. F. & A. M. had its annual election, and the following officers were chosen for the ensuing year: C. B. White, W. M.; J. S. Bedford, S. W.; T. C. McBurney, J. W.; Louis Weinberg, treasurer; W. E. Ripley, secretary. Next Thursday evening [illegible] special Masonic lodges will join [illegible] of officers.

Upon a warrant from Justice Corbin's court at Victor, D. M. McNamara was arrested this morning at the instigation of the Altman Pipe Line company. McNamara is charged with malicious mischief. It is alleged that he uncovered the water pipes of the company, allowing the water to freeze. He was placed under $100 bonds and his hearing set for Monday. He gave the bond. McNamara lives near Windy Point, and on different occasions has had trouble with the water company relative to the right of way for water pipes over his property.

The school children of the McKinley school have arranged for an entertainment at which time funds will be raised for the purchase of a bust of the martyred president. The bust will have a prominent position in the school building. The entertainment will be held on Friday, December 20.

Mary A. Erickson was granted a divorce in the county court today from A. V. Erickson, upon the ground of desertion and non-support.

In the case of DeCow versus the Atlas Oil company, the plaintiff was given a verdict for $100 in the county court. Alex Billey was given judgment for $100 from Joe LaMore in this court.

L. E. Sherman today gave a mining deed to the Stratton Cripple Creek M. & D. Co. in consideration of $1 for the City of Paris lode claim in conflict with the Gold Pass lode claim. The same party transferred to the company the Jubilee lode claim for a consideration of $1. L. E. Seaton today gave a warranty deed to Emma B. Wann for lot 30, in block 11, Spicer addition to the city of Victor. The consideration was $3,450.

The examination for the academic department of the Colorado Bar association will be held in connection with the teachers' examination, December 20 and 21, in the High school building in this city, beginning at 9 a. m.

Judge L. W. Cunningham came up this morning from Colorado Springs and presided over division 2 of the district court today.

Max Strauss, the well-known mining man of Denver, is in the city on business.

Charles F. Potter of Denver is in the city and will spend a few days here on business.

Mrs. Murdock McKenzie and Mrs. Hilderbrand, of Irene street, expect to leave the last of the week for Colorado Springs, where they will spend several days.

Out-of-town arrivals at the National hotel today were: L. P. Eldredge and W. Weston, of Colorado Springs; K. R. Lazar, S. D. Goza and J. Winchester of Denver; Frank Hall of Baltimore; G. C. Conkle, J. H. Waters and wife, of Canon City.

COUGHS AND COLDS IN CHILDREN.

Recommendation of a Well Known Chicago Physician.

I use and prescribe Chamberlain's Cough Remedy for almost all obstinate, constricted coughs, with direct results. I prescribe it to children of all ages. Am glad to recommend it to all in need and seeking relief from colds and coughs and bronchial afflictions. It is non-narcotic, and safe in the hands of the most unprofessional. A universal panacea for all mankind. Mrs. Mary B. Melendy, M. D., Ph. D., Chicago, Ill. This remedy is for sale by all druggists.

Evans Scotch Malt.

Sure cure for cold and bronchial troubles. Sold by all druggists. Don't take a substitute.

NEWS NOTES FROM PUEBLO

Officials of the Colorado Fuel and Iron Company Spent the Day in the City.

Pueblo Bureau Colorado Springs Gazette

Pueblo, Dec. 12. The much looked for ward to arrival of the steel magnates occurred this morning at 8 o'clock. There are 18 in the party and they reached here via the D. & R. G. in a special car from Denver. They proceeded to the Minnequa plant of the C. F. & I. company immediately upon their arrival and the morning was spent inspecting that big industry. Among the party are J. C. Osgood, chairman of the board of directors of the C. F. & I. Co., of Denver; John W. Gates of the American Steel and Wire company; John J. Mitchell, president of the Illinois Trust & Savings bank; John C. Hutchins, general attorney for that institution; John Lambert, of the American Steel & Wire company; Charles G. Gates, all of Chicago; James A. Blair of the banking house of Blair & Co., New York; J. B. Dennis and J. R. Ryan of the same house, and William Garrett of Cleveland, an eminent engineer who has been closely connected with the building of large steel plants and furnished the plans for the plant at Lake Minnequa for the company. Manager McKennon and Superintendent Lee of the Minnequa works, assumed charge of the party while here. From Pueblo, the party will proceed south, where a visit will be paid the principal coal camps of the company. A brief stop will be made at some of the Huerfano county mines also. The line of the Colorado & Wyoming railroad up the Las Animas river will also be covered. Later a visit will be made to Redstone, the center of the operations that have transformed the Crystal river valley into one of the liveliest centers of activity in the state. The special cars will be transferred to the Crystal River railroad at Carbondale for the trip to Redstone and Coal Basin. The portion of the trip from Redstone up to the new mines opened within the past two years will be by narrow gauge. The party will be entertained at the home of Chairman Osgood near Redstone, where his palatial summer residence is in course of erection.

The entire day was consumed in inspecting the plant and as it was storming very hard this evening, the party decided to remain here in their special cars tonight when they will continue their tour. In a short conversation with a Gazette representative, Mr. Gates and others expressed themselves as being well pleased with the condition of the plant and the outlook for the future, but refused to make any statements as to what their intentions were in regard to further improvements, additions, etc. They also refused to say anything about the meeting of the board of directors in Denver.

It is stated at the steel works by officials in the freight department that all the Colorado & Southern side tracks between here and Colorado Springs and west of that point along the Midland are congested with hundreds of cars loaded with iron ore and billed to the steel works. Notwithstanding this fact, the supply of ore at the works keeps pace with the demand.

Late this afternoon an answer was filed in the county court to the complaint filed by E. C. Highberger asking for a recount of the votes in the last election and contesting the election of Mr. Fairbanks. The answer made a general denial to the allegations set forth by the contestor and such counter allegations of fraud and illegal voting. On the ground that Clerk McCaffery illegally instructed the voters of precinct 20 the court is asked to throw out the entire vote of this precinct. The answer contains many similar allegations.

The ministers association of this city and the Volunteers of America are actively engaged in making preparations for an aggressive campaign against the Sunday saloon, and the war will be on in earnest in a few days. A committee composed of the Rev. Drs. Craft and Weaver, have met twice this week, and the following petition has been quietly circulated and upwards of 1,000 names have so far been attached: "To the Honorable Mayor of the City of Pueblo: Believing it to be conducive to the welfare of our city that the saloons shall be closed for business as other stores and business houses are from 12 o'clock Saturday night until Monday morning at 6 a. m., we therefore petition the honorable mayor of Pueblo to use his office and influence to the strict enforcement of the laws which require this to be done." "You may depend upon it," said Mr. Frank Dunn this evening, "that something will be done in the matter soon and that in a short time the Sunday saloon in Pueblo will be a thing of the past. We mean business."

The Philadelphia smelter paid off today and Bessemer business men have done a fine business in consequence. There are hundreds of the employes of the smelter who reside in that portion of the city and who do a large portion of their trading there.

James McClelland, an engineer of the steel works, met with an accident yesterday that will likely lay him up for some time. He was handling a large piece of iron when he fell and caught his ankle, severely bruising and spraining it.

The boarders of the Central hotel are arranging to give Mrs. Daniel Hartnett, the popular landlady, a party on her birthday, which will be on December 17. Mrs. Hartnett is very popular with the guests, and they are determined that the anniversary shall not pass without being most auspiciously observed.

John Crossen is having built a handsome cottage home in the Minnequa addition.

Miss Hodges, principal of the kindergarten school in the Bessemer building, is arranging to give her little charges a pleasant time on the day before Christmas.

Bob VanFossen says that the coming banquet to be given by the Red Men will be the greatest event of the kind ever held in Bessemer.

John Preston, a business man from Lincoln, Neb., was looking over Bessemer this morning with a view of locating.

C. L. Stonaker, secretary of the State Board of Charities, was in the city today.

A. J. McToy of Colorado Springs, is a guest of the Maine.

J. F. Laycock of Colorado Springs, is transacting business in the city today.

Frank Soper, formerly a well known citizen of Pueblo, but for the past eight years a resident of Denver, is in the city renewing acquaintances and expects to locate here in business.

A. S. Cuthbertson, commercial agent of the Colorado & Southern railroad, who has been on the sick list, is able to be out again.

E. S. Carr has returned home from Denver, but Mrs. Carr will remain several days longer.

Next Tuesday evening a social will be given at the Y. M. C. A. The Young People's union of the Mesa Baptist church have charge of the affair.

The Knights of Columbus gave a smoker at Germania hall this evening. An enjoyable time was had by all.

The two soldiers who were left behind when the 11th cavalry of St. Louis left town, were furnished transportation over the Colorado & Southern and went to join their troops this morning.

ALTMAN

Special to the Gazette.

Altman, Dec. 12. The volunteer firemen gave a very successful ball here tonight. The event was largely attended and everyone had a very enjoyable time.

The Havilland High Five club spent a very pleasant evening last night at the home of Mr. and Mrs. Peter Knute.

A. J. Sapp, L. G. Eggleston and R. M. Payne, all of Findley, O., were visitors here yesterday.

The Altman Mandolin club met at the home of Mrs. Grace last evening.

Mrs. Stella Hastain is visiting friends in Denver.

Mr. and Mrs. W. E. Holmes have returned from a pleasant visit to Colorado Springs.

Mrs. J. J. Schenk has left for Denver where she will visit friends and relatives until after the holidays.

SPEND CHRISTMAS AT HOME

One fare for the round trip via Colorado & Southern Dec. 24, 25, 31 and Jan. 1.

The Cavalier 85c each

"The Cavalier."

We place on sale for today only, 81 copies of "The Cavalier," at 85c per copy. The regular price is $1.50.

We have never heard of this book being sold at any such price before we doubt if it ever has.

It is certain it cannot be sold for less without heavy loss to the dealer. We want you to understand that it is to your interest to buy your books here. We have more good, new, salable books than any two or three book stores in Colorado Springs combined.

We sell books at wholesale as well as retail. We buy most all of our books in quantities and get the jobbers discount.

We can afford to sell them for less than some dealers can buy them. This sale on "The Cavalier" is only one of a series of slaughter prices on popular books.

It is our intention to do the Christmas book business of the town.

Illustrations

by Christy from "The Cavalier," the most popular book in the United States.

The latest of the popular novels, suitable for holiday gifts, is "The Cavalier," by Geo. W. Cable. In three weeks it reached the enormous sale of 50,000 copies.

It is illustrated by Christy America's greatest illustrator.

NEWS NOTES FROM VICTOR

Victor Bureau Colorado Springs Gazette

Victor, Dec. 12. A bold but unsuccessful attempt was made at 6:40 o'clock this evening to hold up and rob the assay office of Morris & Williams at the corner of Spicer avenue and Second street. Williams, one of the proprietors, was in the office alone at the time counting some change. He heard someone enter the building by the back door and remembering the hold-up of Wednesday, he spread the change under a hat on his desk and awaited developments. Two masked men entered the office and covering him with their guns demanded any high grade ore he had in the place. He told them there was none, and one of them proceeded to search the building. Being unsuccessful, both men left. Williams at the time had $50 in bills in his pocket. He informed the police, and the officers were able to trace the men for a short distance by the tracks in the snow. No arrests have been made.

The F. & C. C. road has discontinued the 50-cent rate from Cripple Creek district to Florence and Canon City. The fare is now $2 or within 50 cents of the original fare which was $2.50. While the 50 cent rate was in effect, many people from the Arkansas valley who wished to go to Colorado Springs and Denver would come to the district over the F. & C. C. and then purchase tickets via the Short Line for their destination.

The Midway Lagoon ice rink has been completed in every detail and will be thrown open to the public on Friday night. The rink is and will be is situated on Wilson creek between Hollywood and this city. There is about an acre of ice and the rink is handsomely fixed up for the comfort of its patrons.

The Victor association football team will be organized on Sunday for the season. Gavin Baird, the organizer of the team has secured much good material, and the first game will be played at Denver, probably Christmas day. Later in the season the Louisville club will probably be challenged.

N. R. Sprague left this morning for Denver on a business trip.

E. P. Welch of Denver is a business visitor in this city.

TRAMPS AND VAGABONDS

Are not bothered by their appearance, but

YOU OUGHT TO B

careful of how you look. It's very easy to keep your clothes looking like new. We are originators of the method of steaming gentlemen's clothing which is so effective in removing all stains and gloss from the cloth.

Phone us to call for your clothing. We know we can please you.

CIVIL SERVICE REFORM.

YESTERDAY and today there is being held in the city of Boston the twenty-first annual meeting of the Civil Service Reform league. It would be hard to find in our political history an example of a reform movement more conspicuously and thoroughly successful than this one has been. Twenty-one years ago the civil service reformers began their work in the face not only of general opposition but also of general ridicule. The motto, "To the victors belong the spoils," was accepted as the natural and universal course of our political affairs, and as the only one possible under any plan of government. The public offices were looked upon as a proper reward for partisan service and they were distributed among the party followers upon the same principle that a general would share the spoils of war among his faithful officers and men.

The evils of such a system and its inevitable results in demoralization, degradation and reproach to those responsible for it had attracted much attention, but these evils were largely regarded as necessary ones, and it was seriously claimed that without the hope of reward Americans would not interest themselves in politics and that the party that promised offices to its adherents must always win over the one that failed to make such promises.

The changes that have come in the past 21 years, and more particularly in the past 10 years, have not been due entirely to the Civil Service Reform league, but there is no question that the league deserves a good share of the credit. In this, as in other cases, the organization has succeeded because it represented a widespread public sentiment that existed and developed far outside of the formal association.

Today the principles of civil service reform, merit as a qualification for public office, tenure of office independent of political changes, removal for inefficiency or pernicious political activity, appointment by competitive examination open to all regardless of political beliefs, are accepted as the principles properly regulating the great majority of federal offices, and any suggestion of a change would be denounced by the great majority of the people and would inevitably subject the party proposing it to discredit and defeat.

The Civil Service Reform league does not regard its work as completed. In the present meeting special attention will be given to papers dealing with the necessity for reform of our consular service and to the civil service in our new island dependencies. The consular service is especially one which has been given up to partisan purposes. For years the general rule was that these positions were held by men who were being paid not for what they were doing for the nation but for what they had done for the party. Now, more than ever before, there is a need in these positions for men who are able and ready to do effective work in promoting American commerce and looking after our national interests. We are in competition with other nations whose consuls are thoroughly trained for the work; they speak the language of the countries in which they are resident, they are familiar with industrial conditions and methods of manufacture, they are experienced in business methods, and they are able, in short, to do the work that they are put there to do, both as regards the foreigners and their own countrymen. The only way in which Americans can be given an equal opportunity and the American consular service put upon the right basis is through the civil service reform rules, and there is no doubt that this will be done thoroughly and comprehensively in the near future.

As for the islands, the adoption of strict rules based on civil service reform principles is the only way of accomplishing the work set for Americans to do there with credit to ourselves and with benefit to the natives.

The nation is especially fortunate in having at this time a president whose sincerity in promoting these principles has never been called in question, and who has already given repeated proofs of his intention to make them the guides of his official career.

CHILD LABOR AND MACHINERY.

AT THE recent meeting of the American Federation of Labor at Scranton a resolution was adopted which was not only excellent in itself but also well illustrates the good sense which characterizes the larger part of the actions of the labor unions of the present day. The resolution as originally presented denounced a certain company for making cigars by child labor and machinery. The Federation committee reported the resolution back with the word "machinery" stricken out, and the report was accepted and the resolution as amended was adopted.

Whatever circumstances may be involved in particular cases, there is no doubt that child labor is wrong and that it is detrimental to the interests both of the laborers and the community as a whole. Like excessive hours of labor it tends directly towards breaking down the health and lessening the ability of the workmen, while there is grave doubt whether in the long run it adds anything to the average income of the family. Add to this consideration the further argument that the child should have not only time to grow and time to study, but also that the child has a natural right to play which ought to be secured to him by legislation if necessary, and the evils of child labor are sufficiently apparent so that there ought not to be any room for argument.

In using their power and influence against child labor the trades unions are engaged in a good work and they deserve general sympathy and support.

As regards machinery the case is quite different. Machinery does directly tend to increase the effectiveness of work, not only for individuals, but for the race as a whole. When first introduced it throws men out of work and often is a source of real hardship. At first, too, the gain from it is often very unjustly distributed, so that it appears to do more harm than good. But in the long run it will be found that any machinery that makes human effort more effective and more productive works for the general good. The improvements in agricultural machinery, the applications of steam and electric power to transportation by sea and land, and the almost infinite developments of manufacturing machinery in all departments are responsible for the resources which are at the command of the poor man today as well as for the rich. The bread we eat, the clothes we wear, the books we read, the pictures we see, the bicycle or the trolley car in which we go to our work, the heat of our houses and shops and the light by which we extend our days beyond their natural length are all products of machinery, and without the service that machinery has rendered in increasing the productive power of the human hands and brain, very few of us could command any of these things or their equivalents.

If the dreams of the socialist ever come true, or if our industrial conditions ever approach the ideals of a minimum of effort with a maximum of result equally distributed among all deserving citizens, they will come through the perfection of machinery and our increasing ability to control natural forces and to direct natural processes for our own benefit. To discriminate against machine-made products or to attempt to delay the course of invention is to place oneself squarely in opposition to the accomplishment of that which every labor union strives for as the highest industrial and social good.

Child labor and machinery are opposite extremes. Child labor, excessive hours, seven day work, the employment of married women in factories, are part of an industrial system, happily fast disappearing, in which constant and unremitting toil for the maximum period possible was necessary to secure the barest living. The advent of machinery is changing all that and we see already the beginning of a better day.

A COMPLAINT FROM COUNCIL BLUFFS.

THERE are a lot of people in the world who do not know when they are well off. According to a special dispatch in a Denver paper the folks down at Council Bluffs, Iowa, are becoming quite indignant because the Burns-Doyle case is dragging along in the courts and costing money. They estimate that it has cost the county fifteen thousand dollars ($) for court expenses during the 50 days the trial has been on. If it costs that much money for thirty days to try a case, then the cost for the year is $180,000. That is for jury trials alone. The figures are off, or else the citizens of Council Bluffs are entitled to a grand jury investigation of court officials.

But suppose that it has cost $15,000. The little old town of Council Bluffs has for a brief time emerged from the obscurity that surrounds her as "just across the river from Omaha," and is having a genuine boom. Advertising is worth something. A portion of Colorado Springs' millions are being "blown in" down there just now. Burns and Doyle are occupying all the best accommodations to be had in the city. There are at least fifty witnesses and a host of attorneys present. These people put out not less than $5 a day each on necessary expenses. Some of them are people who spend $50 or $100 a day just as regularly as the ordinary man gets rid of his one dollar. It is safe to say that the crowd spends not less than $600 or $700 a day in the town of Council Bluffs. Let us put it at $500 a day for 30 days, or $15,000.

Against this let us figure probable court expenses. One judge at $10 a day would be $300; one jury at say $2 a day each would be $720; feeding jury at $1 a day each is $360; light and heating figure at $50; one clerk at $5 a day is $150; two bailiffs at $2 a day each is $120. The total is $1,700. These figures are all higher than one would really have to pay in dear old Iowa, but we give the benefit.

Colorado Springs has had many long mining suits, they cost El Paso county a good many dollars, but we liked them. When they cut Cripple Creek off and the courts went to Teller county it was the blow that almost killed father. If Council Bluffs people get real mad about it, we hope they will send those rich mining fellows back home to fight out their troubles.

Isn't it just like a farmer community? A town that is seldom visited, excepting by traveling men, suddenly finds itself over-run by people who do not care for expenses. The bar tenders who have been accustomed to hand out only the straight thing are paralyzed with a demand for something mixed with a cherry in it. Hackmen are ordered to wake up and get a move on themselves. The theaters are patronized and away early in the morning voices can be heard saying in a mysterious way, "two call five." The courts that have droned away and delayed an occasional case for years are actually made to work 30 days in succession. Then the horrible thought comes: "We are getting too giddy. This can't last and it is costing money. Don't get extravagant and acquire the habit of spending money, no matter how much it may bring in."

LET PUEBLO IN.

THE GAZETTE hopes that some way will be found of adding Pueblo to the membership of the Western Baseball league. That city is growing very rapidly and is enjoying prosperity. Nothing in its former baseball record is a fair indication of what it would do under present conditions.

The Colorado cities are a long distance from the Missouri river points. On general principles it certainly looks better to include in the league three Colorado cities rather than two, when so large a sum is necessary for railroad fares.

Pueblo is a good neighbor and would be a welcome visitor at the ball games.

Let Pueblo in.

Announcement is made of the probable visit to this country of the crown prince of Siam, Majah Valjarivahrudah. A regiment of Kentucky colonels should be appointed to receive the majah.

Home trading helps home progress.

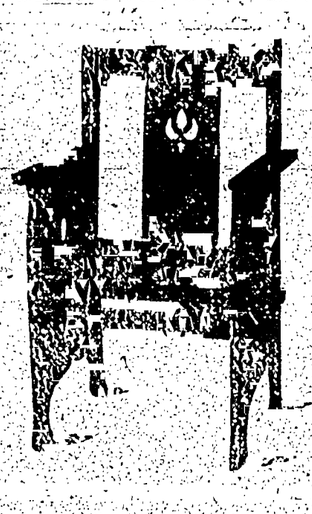

DEVELOPMENT OF KANSAS WATER RESOURCES.

A new light is thrown on Kansas as a water power state, by a recent report of the United States Geological survey, which gives a number of interesting figures regarding the use and value of the Kansas streams for water power and supply. The geological survey has for several years been conducting measurements of flow on these rivers, and has secured information regarding their water supply which will be of value to engineers and manufacturers. The measurements also show the wide extremes of flow common to streams of this section of the country between the summer and winter months, and indicate the proportion of time in which auxiliary steam power must be used.

Gaging stations are maintained on the Arkansas in a number of places, the Verdigris, the Neosho, Republican, Solomon, Saline, Smoky Hill, Blue and Kansas rivers, where daily observations are made.

Besides its study of the rivers of the state, the geological survey is making a thorough investigation into the possibility of securing an underground water supply which can be reached by wells, and which if discovered will be of the greatest value, especially on the high plains in the western part of the state. It is doubtful if any state has a richer soil or land which can be more readily cultivated than Kansas, and with an abundance of water for crops and stock, settlement and development will be rapid in the western section which on account of its present lack of water cannot be fully utilized.

The value of windmills as a means of increasing the water supply of the state by making use of the prevalent strong and steady winds, has also attracted the attention of the survey and an interesting report on their varieties and uses has been issued.

RESERVOIR TITLE UNDER A CLOUD

State Leased Monument Dam to a Denver Man and Then Gave It to This County--Mistake Just Discovered.

El Paso county owns the big reservoir at Monument, according to an act of the state legislature, but, according to a lease made by the state before the reservoir was given to the county, Salisbury Smith, of Denver, is the owner for 15 years. The commissioners of El Paso county, Attorney General Post and the land commissioners are trying to untangle the badly mixed-up state of affairs.

The commissioners were in Denver Wednesday and returned yesterday with the assurance of the state officials that the county's title to the reservoir would be cleared.

The situation is said to be due to carelessness on the part of the former state officials. In 1899 the state legislature passed an act giving all the irrigation reservoirs not used for the irrigation of state lands to the counties in which they were situated. El Paso county was given the Monument reservoir with the proviso that the county could keep it in repair.

Since that time the county has spent about $2,000 in improving the reservoir.

In October of last year the county commissioners leased the body of water to Doyle & Hanks of Palmer Lake, for five years, giving that firm the privilege of taking ice off the reservoir in winter time, for a consideration. Early this week the firm notified the commissioners that they had learned that before the state had given the reservoir to the county a lease on it had been given to Salsbury Smith, of Denver, for 15 years. The commissioners went to Denver Wednesday and found this to be true. The lease was granted four years ago to Mr. Smith.

Attorney General Post and the land commissioner assured the county commissioners that Mr. Smith has not lived up to his contract for the past two or three years and the land commissioner promised to have the old lease made void, so that El Paso county may have a clear title to the property.

Busy Month in Realty Circles

While other towns are complaining of the stagnation of realty business during the holiday rush, Colorado Springs is enjoying one of the best months in the year. Prominent realty men declare the month of November and the first part of December to have been the most prolific in the promotion of sales of any month in the year. This is not a boom, but the natural sequence of judicious forethought. Colorado Springs is growing at a very rapid rate, and the man who realizes this is simply in the position of the early bird. As an indication of the business recently done, the following statement of sales is made by the firm of Charles Bennett, and as nearly all of the property enumerated is in the residence portion of the city, this means quite a boom in building within a short time:

Among recent sales is that of Martha Pelley and Lula D. Cox of lot 8, block E, D. Russ Wood addition, (1809 block on Wood avenue), to Bloom C. Coy; from the same party, lots 3 and 4 in the same block to Mrs. M. J. Ely; from Ida W. Casser, the southeast corner of Wood avenue and Del Norte to Alexander J. Smith. Mr. Smith is building on the lot purchased by him an attractive cottage, which he will probably make his home. Mrs. Casser has also sold, through Mr. Bennett, the west 50 feet of lot 2, block F, D. Russ Wood addition, to Mrs. Mary J. Ely. Mr. Bennett has negotiated also the sale from Mary L. and Helen J. Givens of the residence No. 318 South Cascade avenue, to Edward L. and Mary L. Jessup; from Henry L. Gregg, lot 4 and from Pauline H. Gregg lot 5 in block D, of the D. Russ Wood addition to Mr. Russell. The property adjoining this on the south has been purchased through Mr. Bennett from W. H. Rusch by James W. Allen. Mary K. Bartlett has sold to John H. Craig, lot 12, block 52, addition No. 1 to West Colorado Springs. Franklin E. Brooks has sold to Mrs. Helen E. Waterman the lot on Wood avenue immediately north of Secretary Long's residence. Christian C. Zebker has sold to Annie L. Boardman two fine lots containing about an acre each on the Cheyenne Canon road, a short distance west of the Dr. Lawrence property, and to Francis Hayes a lot similar to these two, adjoining them on the east. Mrs. S. A. Farnum has sold to Celia Reimers lot 4, block C, Highland addition, which is on High street, west of Institute. Mrs. Ferriday has sold to the Misses Miller a lot on Tejon street, opposite the Glockner. F. H. Prince has sold to William B. Herbert lot 2 in block 3, Orrin's addition, and to Earl B. Herbert, lot 3 in the same block. Henrietta Memminger has purchased from E. J. Eaton and Clarabel A. Rowe lot 8 in Capitol Hill sub-division to Manitou. J. W. Glackin has sold to Mary A. Wineman lot 6 in block H, Edwards addition. This is a fine residence site on the west side of Tejon street, in the 1700 block, and Miss Wineman has already begun the erection thereon of a two-story modern dwelling.

The Colorado Springs company has sold to Thekla J. Henderson lot 16, block L, Edwards addition, which is opposite the Steele school. The West Colorado Springs Land company has sold to T. J. Wright a lot on the north side of Washington street, between Third and Fourth. Mary F. MacKinnon has sold to C. E. Maddocks a lot on Boyer, between Cache la Poudre and Yampa. The Colorado Springs company has sold to the El Paso Lumber company lots 9 and 10 in block 272, and lots 20 and 21, block 275, and to Mabel C. Chaplin, E. K. Titus and Lucy C. Titus, lot 4 in block D, Wood Avenue addition. Helen E. Waterman has sold to Mrs. Mary S. G. Wildes a fine residence site on the west side of Wood avenue, between Buena Ventura and Caramillo streets. Rosina Guild has sold a ranch of 320 acres in Pueblo county to F. C. Thornton. The property No. 508 South Weber street has been sold by Edward W. Parsons to Charles W. McKee. A tract of land 100x190 feet at the southeast corner of Prospect street and Willamette avenue, has been sold by Sarah M. Lewis to Theodore McCreery. The foregoing sales were all negotiated by Charles P. Bennett.

Rock Island Official Is Sued for Divorce

Sensational charges are made by Mrs. Martha Ann Day, of Manitou, against her husband, Robert W. Day, chief engineer of the Rock Island, in a divorce suit begun yesterday in the district court in this city. Mrs. Day, who is well known in this vicinity, and whose pretty daughter, Mabel, is a member of the Frank Daniels Opera company, alleges that for seven years her husband has been living with a woman named Mrs. R. B. Carson. Mr. Day and Mrs. Carson, according to Mrs. Day are now living in Chicago. Mr. and Mrs. Day have two children, Robert, aged 21 years, and Mabel, aged 18. The boy is now living with his father in Chicago and Miss Day is on the stage, because, it is alleged, her father refuses to support her and she is compelled to earn her own livelihood. Mrs. Day has been making her home in Manitou ever since her husband is said to have deserted her for the other woman.

In the complaint filed yesterday, Mrs. Day through her attorneys, Crowell & Lombard, says that she and Mr. Day were married in London, Eng., December 20, 1874. For 20 years they lived together happily. Seven years ago, it is alleged, Mr. Day abandoned his wife for Mrs. Carson, with whom he is said to have been living in different western cities. Mrs. Day says her husband first took Mrs. Carson to Kansas City after that to Topeka. At the latter place, the complaint states, they were compelled to move from the respectable residence of the city by the citizens. They are now living in Chicago, and it is alleged that Mr. Day refuses to communicate with his wife.

Mrs. Day states that her husband has tried to induce their daughter, Mabel, to visit him and Mrs. Carson, and upon her refusal to do so stopped contributing to her support.

Mr. Day is said to be earning $500 a month in his capacity as chief engineer for the Rock Island railroad, and besides absolute divorce Mrs. Day demands alimony. She says that when her spouse left her he gave her a home in Manitou.

The plaintiff's attorneys also made a motion yesterday for $100 a month temporary alimony and $300 fees and costs. This motion will be heard in a day or two by Judge Cunningham.

Garfield School Art Exhibit Begins Today

The art exhibit of Garfield school last year was of such unusual merit that this year's exhibit is considered one of the great winter events. The exhibition opens at 2 o'clock this afternoon and will be open all afternoon and evening and tomorrow afternoon and evening.

The exhibits include the work of Miss Helen Hyde, an American girl, who has appropriated the art of Japan to American ideas and ideals. Miss Hyde is quite a remarkable young woman. She went to Japan over two years ago to study the child life of that quaint country. Her vacation of a few months lengthened into two years, and all the time was devoted to study and work.

Miss Hyde is a San Francisco girl and has been surrounded all her life with art-like environments. She lives with an aunt in San Francisco and her home there is a veritable museum. For three years Miss Hyde studied in Europe under Felix Hegemay, Raphael Collins and Skarbina. She then returned to San Francisco and began her work with the children of Chinatown as models. Up to this time Miss Hyde had done little else than water-colors, but one day she determined to try her hand at etching. She made a sketch of a little girl sitting on a doorstep. When finished the etching seemed to need something. She could not tell what, and she decided that etching was not in her line. She also had been painting that afternoon and her palette lay near. Idly etching it up she applied color to the sketch and again ran the plate through the press. And lo! the indefinable something had been supplied. Miss Hyde now speaks affectionately of the little picture, which she calls "Tottie," as "my first," and since then has done much work in etching in line and color. Most of her work in this line, however, was done with the Chinese models before she went to Japan. The work of making colored etchings is exceedingly tedious. Only 100 prints can be made from a single plate. After this number a new plate must be made if more prints are desired. For each print the colors must be renewed, the plate being painted as carefully and delicately as any water color picture.

A separate printing is necessary for each color. Added charm and value, therefore, are given to the etchings because no two pictures can possibly be quite alike. All the etchings are made on the silky Japanese paper, which requires skillful and delicate handling.

It was through the advice of her master, Kano, that Miss Hyde sent two of her pictures to the Japanese exhibition in Tokio last spring. One of the pictures took a first prize from the Japanese artists. This picture was "The Monarch of Japan," a kakamona nearly six feet in length and drawn with simplicity, truth and feeling. It is of two Japanese women playing with a quaint baby. This was the first time a foreign artist had won a prize of the native artists and it attracted great attention. This picture is among the collection to be exhibited next week.

"Belated" is another in the collection that has attracted much attention. It is a study of the true oriental spirit, of a little girl carrying a lantern, the light of which shines up in her face, with a soft glow. A particularly dainty bit of work is "Waiting," in which a tiny maiden is seated with her back turned, looking out into the distance. "Winter" is also considered one of her best. "The Doll's Dressmaker" is considered the chef d'oeuvre of the exhibition to be held here. The best of the Chinese paintings is "Feast of Lanterns."

Most of Miss Hyde's work treats of Japanese domestic life, but she seems at home also in landscape work. The "Japanese Madonna," which has won such commendation from art lovers, is one of the latest and most characteristically Japanese—as perhaps the most serious—of all the young artist's etchings.

Miss Hyde's own Japanese maid has served as the model for many of her most successful works. This collection of pictures will be on exhibition all next week.

The Handsomest Calendar

of the season (in ten colors) six beautiful heads (on six sheets, 10x12 inches), reproductions of paintings by Moran, issued by General Passenger Department, Chicago, Milwaukee & St. Paul railway, will be sent on receipt of 25 cents. Address F. A. Miller, General Passenger Agent, Chicago.

Special Sale.

Christmas presents at Sam Wing's, opposite Postoffice.

How to Prevent Croup.

It will be good news to the mothers of small children to learn that croup can be prevented. The first sign of the disease is hoarseness. A day or two before the attack the child becomes hoarse. This is soon followed by a peculiar rough cough. Give Chamberlain's Cough Remedy freely as soon as the child becomes hoarse, or even after the rough cough appears, and it will dispel all symptoms of croup. In this way all danger and anxiety may be avoided. That remedy is used in this way by many thousands of mothers, and has never been known to fail. It is, in fact, the only remedy that can always be depended upon, and that is pleasant and safe to take. For sale by all druggists.

An Evangelist's Story.

"I suffered for years with a bronchial trouble and tried various remedies but did not obtain permanent relief until I commenced using One Minute Cough Cure," writes Rev. James Kirkman, evangelist of Belle River, Ill. One Minute Cough Cure affords immediate relief for coughs, colds and all throat and lung troubles. For croup it is unequalled. Absolutely safe. Never fails and a favorite with the children. Hefley-Arcularius Drug Co., C. E. Smith, 117 South Tejon street.

25 cents to Cripple Creek by the Colorado Midland railway.

AVERY-DICKINSON

PRETTY HOME WEDDING ON EAST DALE YESTERDAY.

Colorado Springs Young Lady Becomes the Wife of a South Dakota Minister About Sixty Present.

Yesterday at 1 o'clock p. m. Rev. Dr. James B. Gregg, pastor of the First Congregational church performed the ceremony uniting Miss Emma M. Dickinson and Rev. Oliver Perry Avery in marriage. The event occurred at 218 East Dale street, the home of the bride's mother, Mrs. S. F. Dickinson, in the presence of about 50 relatives and friends.

The house was appropriately decked in honor of the joyous occasion. The balustrade of the staircase was a mass of fragrant pine boughs. Tall palms were banked before the mantel and across the corner where the participants stood. Miss Louise Currier presided at the piano and rendered the wedding march. In the ceremony the ring service was used.

The bride was arrayed in white India mull trimmed in real Russian lace of exquisite pattern and white satin ribbon. She wore no veil. On corsage and in the hair were real orange blossoms sent from Pasadena, Cal., by relatives. The bridal bouquet was of white roses tied with white satin ribbon.

Attending the bride as maid of honor was her sister, Miss Esther Dickinson, in white dotted swiss trimmed with pink ribbon. She carried pink roses.

Mrs. Dickinson, the bride's mother, and a cousin, Miss Laura E. Hughes received the guests. They were admitted by little Misses Blanche Trevarthen and Lucy Shepard, who wore dainty white frocks.

Mrs. Dickinson's gown was of black crepe garnitured with three shades of lavender ribbon and duchesse lace. Miss Hughes wore pink lawn garnitured with black velvet.

Messrs. P. D. Rice and Lacy McClintock were ushers.

From a table, tastily decked with pink and white carnations, refreshments were served by Mrs. Augustus P. Brigham, Mrs. Arthur Crissey, Mrs. Korsemeyer and Mrs. Florian Cajori. Assisting were Misses Guzman, Crissey and Canon.

At 6:51 p. m. Mr. and Mrs. Avery departed for Deadwood, South Dakota, where Mr. Avery is pastor of the First Congregational church. He was in Colorado college for two years and received the degree of A. B. He also graduated from Yale Theological seminary, and afterwards took a post-graduate course in Glasgow, Scotland.

Both Mr. Avery and his bride have many friends in the city who extend hearty congratulations and express the wish that prosperity may attend their union.

With other members of her family, Miss Dickinson removed to this city about five years ago from Grand Junction. Her father, the late Rev. S. F. Dickinson, was pastor of the First Congregational church in that city for several years.

WEATHER FORECAST.

Washington, Dec. 12.—Forecast for Colorado: Snow in the early morning; followed by fair and cold Friday. Saturday fair and colder; variable winds.

Robes and blankets, largest assortment, lowest prices. W. H. Wise, 16 E. Pike's Peak.

A line of sterling silver toilet articles of latest patterns at Ashby's. Oldest established jeweler in the county.

BORN—To Mr. and Mrs. A. S. Andrew a son. Mr. Andrew is foreman of the Telegraph composing room.

JUMMAGE SALE—The Christmas jummage sale being conducted by the W. C. T. U. will be continued today.

ANNUAL MEETING JANUARY 3—The annual meeting of the City C. E. union has been set for January 3, next. The election of officers will be held at that time.

CARNATION CLUB DANCE—The Carnation club held a very enjoyable dance at the Alamo last night. There was quite a good attendance in spite of the inclemency of the wintry weather.

FORESTERS SOCIAL—Court Colorado No 8141 A. O. F. will give an entertainment and social, following a supper, at G. A. R. hall next Friday night, December 20. All friends of the order are urged to attend.

SAID TO BE INSANE—Theodore Bogle, of Fountain, is in the county jail awaiting trial in the county court on the charge of insanity. He was arrested in Fountain by Deputy Sheriff Alward.

MRS. BREWIN'S FUNERAL—The funeral of Mrs. Eliza Brewin, who died Wednesday morning at her home on East Fountain street, will be held today. Services will be held at 1:15 p. m. at Grace Episcopal church.

PAYING RENTS—Water users of the city are keeping City Treasurer Davis busy giving receipts for the second half year's water rents. The rents become delinquent January 1, and there are not many in the city who want their water turned off.

C. E. SOCIAL—The C. E. Society of the Second Presbyterian church will hold a social at the home of Mr. Pierce, corner Colorado avenue and First [illegible]. A [illegible] will be rendered and refreshments served. All are cordially invited.

WOODMEN DANCE—A very enjoyable dance was given by the degree team, Modern Woodmen of America, at Woodmen hall, Wednesday night. The Alamo orchestra furnished the music. These dances are given every month and always prove very pleasant affairs.

XMAS SALE—Mrs. G. C. Robinson's class in the First M. E. Sunday school will hold a sale of Xmas articles Saturday afternoon, December 14, at Mrs. Hibbard's, 320 E. Bijou street, the proceeds to go towards the new church fund. The public is invited to call and inspect.

NEW DROP CURTAIN—A new drop curtain is being painted for the stage of the Temple theater. Several Denver artists are putting the finishing touches to the canvas at the theater. It will be one of the finest curtains in the west. Grant Pauley, manager of the theater, purchased it.

FOR HOME MISSIONS—The Home Missionary society of the First Methodist church cordially invites their friends to a supper which will be served from 6:30 to 8:30 o'clock this evening at the residence of Mrs. Van Dusen, 116 North Nevada avenue. The ladies hope the attendance will be large and that a neat sum will be realized.

POUNDS THE ROCK—Frank Imus, who was arrested on a charge of stealing shoes from B. G. Robbins' store, is now pounding rock on the rock pile. The charge of larceny was withdrawn and a charge of drunkenness preferred in its place. He was found guilty and sentenced to the "knocker's gang" to pound out a fine of $35 and costs.

FOR CHRISTMAS AT THE MISSION—The Christian Endeavor societies of the city will unite in making an enjoyable Christmas observance at the C. E. Mission on Huerfano street. Contributions for this purpose are to be received by Miss Jessie Allen of 216 E. Huerfano street. There is great need of aid in the work at this mission.

WOMAN'S UNION—The meeting of the Home Missionary department of the Woman's union of the First Congregational church will be held this afternoon at 3 o'clock. The devotional exercises will be conducted by Mrs. Clagin; the program is in the hands of Mrs. Fairbank. The subject, "The Work of the Congregational Home Missionary Society," is of especial interest, and all ladies of the congregation are cordially invited to be present.

BUILDING PERMITS—The following building permits have been issued by Building Inspector Corse lately: Mrs. M. A. Preston, for a five-room house at 524 East Del Norte street, to cost $1,300; Hastings Bros. for a four-room residence with bath at 1227 North Prospect street, to cost $1,400; Hastings Bros. for a four-room residence and bath at 1120 North Institute street, to cost $1,200; J. H. Wattson for a residence of seven rooms and bath at 221 East San Rafael street, to cost $2,000; J. M. Alexander for a five-room residence with bath at 1022 North Custer street, to cost $1,400; Mrs. J. M. Ashlock for a residence at 320 E. Caramillo street, to cost $1,400.

AMUSEMENTS

"FOR HER SAKE"

"For Her Sake," a Russian melodrama, was presented at the Opera house last evening to a fair-sized audience which had assembled to witness it despite the extreme cold. The play was rather heavy, with a great deal of tense emotion displayed, incident to the sale of a serf girl, for whose sake her high-born lover undergoes many dangers, and is banished to Siberia at last, although all ends happily enough. The comedy was supplied in a somewhat unlooked for way by a very tragic character in the person of a freed serf whose cringing terror succeeded in amusing the audience, and a stolid Englishman who "never hurried" also assisted to lighten the piece to a slight degree. As a melodrama the play has some merit, with many exciting scenes and ample opportunity for bravado, but it is exceedingly conventional so far as its dramatic aspects are concerned, while the characters are often far from convincing. The cast was above the usual melodrama cast, Miss Cunnington as Olga showing much care and earnestness in her work, although she made the tragedy too insistant to make it always effective.

ANDREW ROBSON IN "RICHARD CARVEL."

The beautiful production of "Richard Carvel" will be seen at the Opera house tomorrow evening. Mr. Robson is supported by a strong company and carries his own scenery for a complete production.

The great triumph which Andrew Robson has made in "Richard Carvel" and which has not yet reached its zenith is due not to the popularity of the book but to the wonderfully vivid embodiment of the hero which Mr. Robson presents in his performance. He completely realizes the character of the young Maryland gentleman who is ready to sacrifice everything for love and country and whose life was a series of delightful and thrilling adventures. Mr. Robson by his charming embodiment of Mr. Churchill's creation, has asserted his right to be classed as one of the most successful romantic actors that the American stage has produced. He has certainly won the hearts of New York theater-goers by his work in this play and the enthusiasm with which the many interesting scenes are [illegible] bears out the assertion which people make after the play that they never got so much enjoyment out of a romantic play before.

"KING DODO."

The largest and most expensive attraction to appear at the Opera house this season will be the comic opera success, "King Dodo," next Tuesday evening. Reserved seats are now on sale for this engagement. The book is the work of Mr. Frank Pixley, the well-known Chicago librettist, and the music has been provided by Gustav Luders, whose name has become familiar through its connection with many popular musical creations during the past few years. "King Dodo" was first disclosed to the public view in Chicago last spring, and to the surprise of even the management it continued to regale residents of the Illinois metropolis for a period of five months with uninterrupted success. The present engagement is under the direction of the Castle Square Opera company, an organization associated with high-class operatic offerings in the larger cities for some years past and this particular effort is said to surpass in every respect all of the former productions for which credit is due the management. It is stated that the piece abounds in the brightest kind of comedy and is set in a musical frame of rare excellence. The complete production is promised for this play, including 80 people and a special orchestra, and the scenic adornment, which is declared to be of a very elaborate description, will all be seen here. Some of the chief members of the cast are: Raymond Hitchcock, Cheridah Simpson, Gertrude Quinlan, Mrs. Delamotta, Greta Risley, Elsa Ryan, Edward A. Clark, Arthur Wooley and Charles W. Meyer. It is believed that "King Dodo" is an operatic creation of a very high order and that money has been lavished without stint upon the production. The engagement in Chicago far outstripped in success and duration of time anything recorded in Windy City theatricals, and this fact alone should be a guarantee of the superior excellence of the attraction.

WILL NOT INTERFERE IN MEYERS CASE

According to a special to the Gazette from Denver, the state authorities have decided not to interfere in the case of H. H. Meyer, a Boulder carpenter who is well known here and who is detained in a private insane asylum at Pueblo. However, it is said that his condition is much improved and he may be released in a few weeks. His friends claim that he was committed to the asylum through a political conspiracy and appealed to Governor Orman and the state board of charities and corrections for an investigation. He has been in the asylum six weeks.

Mr. Meyer has numerous friends in Colorado Springs, where he worked a number of years as a carpenter. One of his friends is H. W. Wymon, and it is said that if he is released Mr. Wymon will give him employment at his old trade. Mr. Meyer constructed Mr. Wyman's house at 35 Cascade avenue.

FOUR STORE ROOMS ON SOUTH TEJON

Mr. J. J. Mayo, the contractor, is at present constructing four store rooms on the east side of Tejon street south of Costilla street.

The four store rooms will be one story high each and will cost altogether $6,500. There are several stores in this section of the city and the demand for more is quite large. Mr. Mayo expects to rent his stores as soon as they are completed.

BOOKLET ON THE ANTLERS IS OUT

The Antlers hotel owners have issued one of the most attractive publications that has ever been put out by anyone in the Colorado Springs vicinity. It is a booklet containing articles on the Antlers and Colorado Springs by Richard Watkins and H. S. Rogers and handsomely illustrated with new photographs. The work is an exceptionally fine production from a typographical standpoint and reflects extraordinary credit upon its publishers, the Out West Printing and Stationery company.

House of Representatives, Washington, Washington, D. C., Dec. 5, 1901.

Notice is hereby given that a competitive examination of candidates for the West Point Military academy will be held at Colorado Springs, Colorado, under the supervision of Prof. John Dietrich on the 10th and 11th days of January, 1902. Any person between the ages of 17 and 21 years, from the second congressional district of Colorado is eligible, if qualified mentally and physically to meet the strict requirements of the military academy.

DR. PRICE'S Cream Baking Powder

The difference of cost between a good and a poor baking powder would not amount for a family's supply to one dollar a year. The poor powder would cause doctors bills many times this.

Dr. Price's Cream Baking Powder is the most economical in the end, because it goes further in leavening and insures perfect, wholesome food.

Used always in making the biscuit and cake it saves both health and money. Made from pure, grape cream of tartar, most healthful of fruit acids.

PRICE BAKING POWDER CO., CHICAGO.

NOTE. You cannot, if you value good health, afford to use cheap, low-grade baking powders. They are mostly, in spite of the pure-food laws, made from alum, which endangers the health. All physicians will tell you that such powders in food are injurious.

Information About Colorado

THE CACHE LA POUDRE. Mrs. Jane A. Bridrow, of this city, contributes the following historical sketch of the naming of the Cache la Poudre river to the November number of the Chautauqua Journal:

Newcomers arriving in Colorado ask how the beautiful mountain stream in the northern part of the state came by the name of Cache la Poudre. Antoine Janisee, the son of Antoine Janisee, the trapper and fur trader, gives the following as the true story of the origin of the name:

My father was sent to the Rocky mountains by the St. Louis Fur Trading company. There was much money to be made in the business, and there was danger, too, and the men the company employed were men of courage, clear heads, some education, and of integrity above suspicion," said Antoine slowly and proudly. "They found a country mostly composed of Indians and wild beasts, but as a rule we had all true but little trouble with the red skins. The traders, many of them, soon had Indian wives whom they treated kindly, and that was a bond of union between us and the different tribes. It was after the whites began to come in numbers and forts were established at several points that affairs became serious. The newcomers found so many pretexts for shooting Indians and killing so many of their buffalo, which they regarded as their especial property, being their chief reliance for food and covering for their tepees, it roused an ugly feeling of jealousy and alarm that warned the traders of a new state of affairs.

"My father, with his Indian wife, had a comfortable place on the river, and carried on a brisk trade with the Indians, buying the skins of the animals they killed and paying for them in ammunition and blankets. All was comfort and peace until one night, I can well remember, I was helping my father pack a large number of skins, which he was to send to a trading post on the frontier by one of his scouts. While busy at work, father was surprised to see French Pete, another trader, who was living north of us, walk in, evidently very much excited. In a few words he told us his errand. The Cheyennes and Apaches were on the warpath and were gathering in large numbers a few miles down the river, with the purpose of overpowering us and stealing father's powder, guns, etc. It was necessary for us to get away as soon as we could. That we could do, but what was to be done about the powder? Those red devils must not get hold of it if we sink it in the river," said French Pete. "We cannot carry it, we must hide it," said my father. "But where? We will bury it," said both Pete and my father. Boy though I was not quite 21 years old I was eager and anxious to help, for there was much hard work to be done before morning. And all of us, father, mother, Pete and myself, were soon hard at work digging a pit, not far from the river. Of course the powder was the first consideration, as it was the most valuable and important of our possessions. It was our only defense, it gave us food and was our chief reliance. How we worked through that long night. A [illegible] dug it must have been 20 feet in depth, before father was satisfied. The precious kegs of powder were laboriously carried from our storehouse, a cave in the side of the hill, and carefully lowered into the pit. The skins were next brought and placed over the powder, then provisions we could not carry, and the earth was filled in its place. The task was finished only as day began to dawn, and to destroy all traces a fire was kindled over the spot and branches of trees half burned scattered about.

"Before the last ember was extinguished a friendly Indian came as fast as his horse could run to tell us the Cheyennes were coming. All was hurry now. Our guns were secured, our ponies brought, and we made all haste to get away. But before starting father took me by the hand and pointing to the spot where the precious powder was safely hid, said in his slow way: 'Antoine Cache la Poudre.' He had hardly finished speaking when the yells and whoops of the Indians were heard. There was a large band of them, fifty or sixty, and they were having a big powwow over getting our powder. Some of them did get a portion of it, as we saw with bullets. French Pete shooting two at once. It was his boast that he would never waste his ammunition over an Indian, but get two in range and then shoot. It was surprising how many times he made his boast come true. We went north into Wyoming. The Indians never found the buried powder. When father long afterward came back to get it the story had been told and the river was called by all in the region, 'Cache la Poudre.'"

It is needless to add that this name has never changed during the years that have passed since Antoine Janisee so successfully hid his powder near its banks. The depression where the pit was dug in which it was buried is still to be seen in that lovely fertile valley so fitly named "Pleasant Valley." (Fort Collins Courier.

SUGAR BEETS AT ROCKY FORD.—The best acre of beets at Rocky Ford this year was on the farm of D. V. Burrell. It produced 41 tons but the tare reduced it to 40. When the beets were transformed into sugar they made 11,340 pounds of refined sweetness. Mr. Burrell received a check from the factory for $180.07, and he had besides 10 tons of pulp and the tops, worth $5 per ton. The factory received $375.50 for the sugar. J. M. Below raised 37 tons and 500 pounds on an acre; Charles Kearns 36 tons and 1400 pounds and M. O. Anderson 35 tons and 1,200 pounds.

What Rocky Ford has done Sterling can do if her people will go to work. There are literally millions of good hard dollars in it for our people so why not to do it? (Sterling Advocate.

STATISTICS OF WELD COUNTY.—E. H. Stevens, county assessor of Weld county, has just completed his abstract of the assessment. By it we find that the assessed valuation of Weld county, is made by the new revenue law, $19,586,180.58, over twice the amount of what it was last year, which was in round numbers $8,200,000. There are 232,183 acres of agricultural land valued at $5,312,845, 1,117,177 acres of grazing land quoted at $1,453,675, and 2,235 acres of coal land, listed at $70,795. There are 265.44 miles of railroad and 469.06 miles of telephone lines in the county. Horses, number 15,010; mules, 661; cattle 40,405; sheep, 85,456; swine, 3,450; the total valuation of which is made at $1,493,585. Weld county town lots are worth $510,220, and improvements on same $3,042,545. (Greeley Republican.

CRYSTAL RIVER EXTENSION.—The extension of the Crystal river railroad from Coal Basin to the North Fork fruit country will be of great importance to this section of Garfield county.

The North Fork farmers heretofore have had to haul their fruit and other products a long distance before they could be shipped. Naturally with a railroad into that country, running into Carbondale and through Glenwood much traffic will come this way.

The divide between Coal Basin and the Gunnison is not very high and construction of the road will not be difficult. A wonderfully rich country has been opened up on the North Fork even though they had no railway facilities and should the road be built it will no doubt increase the value of resources in that district. (Glenwood Avalanche.

POGOSA OIL IS PURE.—The oil excitement is growing more intense every day, and new companies are being organized right along. There are now 32 organized companies in the county which takes in all the available government land in the county. Deeded land is in demand in favorable localities and the owners can get a big price for their land.

The Home Oil and Fuel company have their derrick completed and the machinery is in first-class working order. The drilling tools and casing have been shipped from Chicago and will probably land here by the 15th of this month. It is reported that Wm. Furrow, the secretary of this company, was out of oil the past week and was unable to get any in town. He broke open some of the rock that came from the Home Oil Co.'s property and managed to get enough to fill a lamp. The lamp burned nicely, while not as bright as the average light, yet it was a great deal clearer than lard oil. This plainly demonstrates that the Home Oil and Fuel company have some choice property.

The Archuleta County Oil and Refining company are on easy street. This is a deeded land company and have land all around Pagosa. If a well is struck in their vicinity they will put a well down immediately.

The Archulota Oil company is a new concern at Chromo. They have let the contract for the derrick and the machinery is all on the ground. The management intends to commence drilling December 10.

The Denver Oil and Mines company have located their new well on M. O. Brown's ranch. Lumber for the derrick is being hauled, and the machinery will probably arrive next week, which was ordered from Florence a few days ago.

The Colorado Mutual Coal and Oil Co. are down about 275 feet. They struck a small flow of gas Wednesday, and are drilling at the rate of 25 feet per day. (Pagosa Springs News.

WE HAVE HOT WATER.—The hot water well is down 155 feet, and a strong flow of hot water has been struck.

Mr. Collins, the originator of the scheme is very jubilant, and well he might be, for undoubtedly if the well was cased the pressure would force the hot medicinal water at least 15 feet above the surface.

The temperature of the water, which shoots up through three feet of the cold river water besides numerous other cold veins struck on the way down, was taken and the thermometer registered 101 degrees. There is no longer any doubt but what this company has struck the real thing.

The stock in this company has jumped from 25 cents to $1 per share, being par at present. The stock is liable to go higher at any time.

The drillers are now reaming out for a six-inch hole, and if they have no accidents, will probably complete this work by Saturday, after which the well will be cased and a thorough test made of the water. Undoubtedly this water will be at least 145 degrees farenheit, which will be the stuff for bathing purposes.

This will probably make it a little inconvenient for the people who are getting water below the bridge, for that kind of water is not very good to quench the thirst. But then it's only a few steps farther to go above the bridge, so there won't be much kick on that score.

And again, the ice men are in a quandary where to get ice this coming winter. But that will be easy. They can either go up the river a little ways or else put in an artificial ice plant. The ice men are all too good natured to kick.

The projectors are very enthusiastic and are already talking about a $25,000 hotel and bath houses, which will undoubtedly make Pagosa one of the greatest health resorts on the continent.

AN EXPERT COMMENDS IT.—There is no abatement in the interest centering about the oil fields to the north of this city. The Record has, during the past few weeks, had several items in which the progress of the work was made public. At no time have there been signs of discouragement. The presence of oil on the surface of the waters filling the creeks and the unbroken flow at the Cassedy spring is sufficient to justify the most sanguine expectations. It is true some exploration work has been done in the past, but it was not sufficient to thoroughly prospect the ground.

These conditions have materially changed within a short time. The grounds have been critically examined by some of the best oil experts in the United States, but more especially by those better posted regarding the oil fields in the west and in California, and by these gentlemen the location and formation of the country, the outcroppings and flowing oil are to their mind a positive assurance that oil exists on all sides of Canon City. Within the past few days Prof. A. Lake, the foremost geologist in this state, has been in the city and made a personal examination of the lands along and lying adjacent to Oil creek (Four Mile) and the Garden Park territory, and says the territory is all oil bearing. This was particularly true regarding the lands owned by Page and Westfall, also the lands owned by the New England Consolidated Oil company. This latter company has its site for the well selected and the Record would not be surprised if the drill was penetrating the earth when this issue reaches our patrons.

The Denver parties who are to sink the well on the Page and Westfall lands are hurrying forward their arrangements and hope at an early date to begin active operations. (Canon City Record.

THE SAN LUIS VALLEY.—While there has been no complaint from any source, of a lack of suitable locations for beet sugar factories, and soils suitable for the cultivation of the sugar beet, yet those who are pioneers in the industry in the mountain west realize that even among good locations, there is always a choice, and that while Colorado alone could unquestionably furnish sites for a hundred factories, those who have the privilege of the first selections are able to avoid certain expenses and enhance the probability of permanent profits.

The San Luis valley has long been celebrated for the fertility of its soil and its adaptability to irrigation. The D. & R. G. company has made a special effort to develop this wonderfully fertile agricultural district, and the individual members of its management have furnished hundreds of thousands of dollars from their own private pockets for the development of the towns and farming communities in that valley.

Theoretically the San Luis valley has everything in its favor. So far as the casual observer can see, it has infinite advantages over almost any other section in the state, and yet with all these advantages it nevertheless remains true that only a very small percentage of its rich and arable lands have been put under cultivation.

Perhaps this may be owing to the fact that a very large portion of the valley was acquired long ago by wealthy men and has since been held with a view to speculation.

Probably no section of Colorado can show so many worthy land-owners, most of them being non-residents, as this San Luis valley. The result of this non-resident ownership has been to keep out small farmers and to make it more of a stock than an agricultural district.

The San Luis valley lies at an elevation of something like 7,000 feet, and apparently was at one period a vast inland lake. The Rio Grande river, in after ages forced its way through the Conejos mountains at the southern end of the park, which drained off the lake and left an almost perfectly level valley, about 125 miles long and 50 miles wide, surrounded by mountain ranges which are from 5,000 to 7,000 feet above it.

The fact that this lake was the drainage place for all the surrounding mountains, and that the sediment washed down from there carried richness of both mineral and vegetable character in large quantities, accounts for the inexhaustible fertility of the soil.

The Rio Grande river runs through the central and southern parts of the valley and early appropriations secured valuable water rights, which have since been made available by the construction of large canals and lateral ditches, so that from a standpoint of artificial water supply the land in the southern part of the park is adequately supplied with irrigation water.

Another wonderful resource is the artesian water supply, which in recent years has been most extensively developed. A few years ago a venturesome pioneer decided to put down an artesian well and water was found that would rise to the surface at a depth of 75 feet. Other wells were then sunk, some going 200 feet and later on as deep as 800 or 900 feet. The deeper wells had a stronger flow of water, and there are now upwards of 4,000 artesian wells in the San Luis valley, all of them giving forth an abundant supply of pure, sweet, clear water, free from mineral and unpleasant odors or taste.

Upon the first cover page of this issue we give an illustration of an artesian well which has been running constantly for the past 11 or 12 years. It is situated about a mile from Alamosa, and, when confined to a two-inch nozzle, will throw a stream from 50 to 60 feet high. The well, however, ordinarily runs at its full capacity of about five or six inches and throws a stream which is sufficient to irrigate fully 100 acres of land. No variation in the supply of water has occurred since the well was sunk.

Hundreds of other wells in the vicinity have demonstrated the permanence of the water supply, and farmers who own these wells are inclined to rely more upon them for irrigation than they are upon the water rights taken from the irrigation ditches supplied by the Rio Grande river. This is not because of any lack of water from the river, but because the artesian water is always within the control of the farmer, and the water is warm, and seems to have a peculiarly beneficial effect upon crops irrigated with it.

It has, however, been demonstrated that the lands which are most fertile and have the richest soil are not sufficiently sub-irrigated to admit of a reliance upon that source of water supply. That section of the valley around Alamosa and southward seems to require a regular system of surface irrigation, and when so treated produces enormous crops.

The special intent of this article is to call attention to the suitability of the San Luis valley for the cultivation of the sugar beet, and the writer, in company with Mr. W. H. Hirst of Alamosa, recently made a somewhat extended examination of the soil in the vicinity of that place. One peculiarity of the soil is that while it has a certain amount of adobe clay in its composition it does not remain lumpy nor does the ground bake hard when turned up. In a short time, after plowing, at any season of the year, the lumps and clods will disintegrate and the ground will become mellow simply by the action of the sun and air.

While there is some sand in all of the soil, it does not appear that any large proportion of the soil can be regarded as too sandy for sugar beets. The depth of the top soil is so great that the nutritious elements necessary to the sustainance of the sugar beet, would seem to be there in sufficient quantity to guarantee a succession of crops for many years. The land requires scarcely any leveling or preparation for irrigation. There is little sage brush here, and where the sage brush exists it is easily gotten rid of by a plow which has been introduced and which demonstrates its capacity to clean up 10 acres of ground per day.

That the San Luis valley is very rich can be readily appreciated when it is known that the prize crop of potatoes grown in a contest arranged by the American Agriculturist of New York, and wherein a prize of $500 was offered for the largest amount of potatoes grown on one acre, anywhere in the United States, was awarded to a farmer in this vicinity. His crop was 50,582 pounds, or about 874 bushels to the acre. It is well known that the potatoes grown in the vicinity of Alamosa equal, as to quality, if they do not surpass, the potato of the well-known Greeley district.

Further, for years farmers in this district have been in the habit of growing wheat which yielded 40 or 50 bushels to the acre and oats which yielded 50 to 75 bushels to the acre, and it is said that from 300 to 400 bushels to the acre is but an average crop of potatoes.

For the past four or five years specimen plots of sugar beets have been grown in the San Luis valley by way of experiment. Every year has proven successful, but no systematic cultivation has been undertaken until this present year.

Through the efforts of T. C. Henry, Esq., and F. W. Swanson, we are able to give a detailed account of some experimental crops raised in different parts of the park for this year. Mr. Swanson and Mr. Henry caused, perhaps, 25 different patches of beets to be grown, and from these, two carloads of beets were gathered around the 10th of November and shipped to Loveland, where they were analyzed by the Great Western Sugar company. The following table shows the names of the growers and the percentage of the sugar in the juice in the beets and the relative purity:

Beet Samples from San Luis Valley 1901.

Grower.	In Juice	Sugar per cent. In Beet.	In Purity.
W. H. Goodrich	16.4	15.6	88.2
North Farm	12.7	12.1	78.9
T. Smith	12.4	11.8	81.0
R. M. Garrett	15.2	14.4	84.4
Geo. Hamilton	12.1	11.5	78.1
Fred Higel	18.6	15.8	85.6
N. Anderson	16.4	15.6	86.8
P. J. Hamil	14.2	13.5	81.6
Peter Anderson	18.3	17.4	86.3
Andrew J. Nelson	14.2	13.5	82.5
South Farm	12.0	11.4	77.9
George Seward	15.9	14.8	86.2
D. E. Newcombe	18.7	15.4	83.5
No Name	14.6	14.0	85.0
Henry Jones	15.2	14.4	86.4
C. S. Aldrich	12.6	12.0	80.3
L. A. Mors	18.7	14.9	87.2

The report gathered did not give the result in tonnage, but from personal observation and inquiry, we are confidenz that the average tonnage if carries to the extent of acreage totals, would have shown a tonnage of from 15 to 20 tons per acre, and this from improperly and unskillfully cultivated ground. The [illegible] and of a long tapering shape, which indicates the looseness of the soil, and the possibility of the beet roots penetrating to the depth of 20 inches, without sub-soiling.

The objection which has heretofore been offered against the San Luis valley as a sugar beet district has been its altitude, and because beets have not yet been grown elsewhere at such an altitude, many drew the inference that it would be unsafe to locate a sugar factory there. It does not appear from the experiments made that the altitude is in any way unfavorable, and the fact that potatoes, carrots, garden beets, turnips, parsnips, and all other similar vegetables have for a period of 20 years or more flourished there, and the oldest inhabitant cannot recall a single year wherein there has been a failure in crops of these roots, it would seem that this objection is untenable, and of no force.

The public-spirited citizens of Alamosa and vicinity have determined that a sugar beet factory shall be located there, and they have invited the representatives of the American Beet Sugar company, the Great Western Sugar company and others to visit the San Luis valley and satisfy themselves of its special advantages for the industry.

A proposition is now being considered by the Great Western Sugar company and the Alamosa people are very much in hopes that this company will decide to build a factory there for the year 1902. It is said to be absolutely certain that 5,000 or more acres of beets would be planted next spring if a factory was assured, and responsible parties stand ready to guarantee the contracting of a sufficient acreage. It is also certain that from $100,000 to $150,000 of local capital could be raised on short notice if it were necessary to secure a factory.

Among those citizens most active in promoting the sugar beet industry may be mentioned the following: F. W. Swanson, S. T. Ambler, M. B. Colt, W. H. Hirst, Senator Adams and others in Alamosa; Jerry Frank, F. C. Gowdy, J. C. Henry, Z. C. Felt and others, of Denver. The enthusiasm of these gentlemen with reference to securing a factory goes so far as to give the impression that whether the Great Western Sugar company decides to build a factory in Alamosa or not, that some immediate action will be taken which will result in the building of a 500-ton plant there, to be ready for operation in the fall of 1902. (Sugar Beets.

A NEW SMELTER.—Mr. C. C. Loder, who is representing the Loder Pyritic Reduction company, of Denver, with offices in the Cooper building, has been in camp this week inspecting the resources with the object in view of putting one of their plants at this point. He is highly pleased with the outlook. In company with Mr. John McDonald he has inspected nearly every property in the district, and has come to the conclusion that a better point for a pyritic smelter could not be found in the state. He has been promised, and contracts will be drawn, by our various mine owners to furnish ore to operate a 150-ton plant. Yesterday and today south Crestone gulch is being prospected. In Burnt gulch enough lime ore can be secured, and from the San Isabel, Cleveland, Sunbeam, Garfield and other properties enough smelting ore to operate in first-class shape. It means much for Crestone and will wake up the outside world to the fact that this district is the greatest mineral section in the entire state. Mr. Loder says himself that he was surprised at the showing that has been made and the mineral in sight. He says that the district is as yet an infant and that when deep mining has been attained the results will be surprising. Mr. Loder and Mr. McDonald will depart tomorrow for Denver, where they will perfect further arrangements whereby Crestone will have a smelter in operation by February 1. (Crestone Miner.

COLD STORAGE FOR FARMINGTON.—Editor Sellers of the Farmington Hustler, and wife, came in yesterday, and are at the Strater. The object of Mr. Sellers' trip is to contract for a quarter of a million feet of lumber for the purpose of erecting an ice and cold storage plant to be of sufficient capacity for 500 head of beef and from 500 to 700 head of hogs, as well as space for fruit and perishable products. The idea is to slaughter the stock and pork when at its best and thus avoid winter feeding, as meat thus preserved is more desirable than from the block. The Hydo company are promoters and the work will be pushed with a vim, as the men who will direct the work are now on the ground. Orders were left at Bowman's mill for a share of the material, but Mr. Sellers will divide the business with all the mills tributary to Durango. Estimated cost of the plant will be $12,000. In the order given is a bill for a combination bridge across the San Juan river at Blake's ranch, near Farmington. (Durango Democrat.

THE GUNNISON TUNNEL.—This week the road to this end of the Gunnison-Uncompahgre tunnel is being built, and by the middle of next week a crew of men will be actively engaged in erecting buildings for the protection of the miners. It has been decided by the board of control not to buy any machinery at present, save cars, as no mining machinery can be used until the slate is passed through, as heavy shooting would jar it down so badly, so a crew of a dozen men will be put to work to drive the great bore through the shale into the solid granite.

Mr. Hannehan, the superintendent selected for the work, says that on careful tests there is but 5 per cent. difference in cost of tunnels run by hand drills and those run by power drills, but of course the latter are much more effective and drive a bore much faster. It is hoped that by spring the bore may be driven 1,000 feet, thus showing what can be done.

John Tobin pushed things this week on the road, and will try to have things going steadily from this time on.

The board is to be congratulated on beginning work in earnest. (Montrose Enterprise.

WEST OF CRIPPLE CREEK.—The Copperhead claim of the Mineral Point company, is shipping ore.

The mine is located on Mineral hill, and the announcement that ore had at last been opened on that mountain created a flutter of excitement in the city yesterday.

The property from which the ore is being shipped is located at the extension of Prospect, if that street were extended further.

The mine is under the management of Ben Swisher.

A little less than two months ago work was started in an abandoned 40-foot shaft. The vein was a treacherous crack that broke and faulted, but it was followed 75 feet further into the ground, and now the management has it five feet wide, and of an average grade of $26 to the ton in gold.

Close to the surface the ore came in bunches. The vein would widen and narrow up, and the granite broke it in an annoying manner at times. At a depth of about 50 feet the walls straightened up, and widened out, until now there is nearly five feet of quartz. Twenty-four inches will run about $60 per ton, the average of the vein being about $26. Twenty-five tons were shipped to the mills at Colorado City, and then bins were constructed, and ore is being saved daily, and that, too, in the sinking of the shaft, which is down to a depth of 115 feet.

The mine is making a little water, and is being operated by a steam plant. One shift is at work, and an extra one will go on the coming week, and the work will be prosecuted more vigorously than ever from this time on.

The property was worked to a depth of 40 feet in the earlier days, but about the time the vein shows signs of pinching, the former owners stopped work. The present management started in where the other fellows left off.

The vein that makes the ore is a north and south lead, through which cuts almost at right angles the great lode that passes entirely through Mineral hill. The point where the property is located is a spur of Mineral hill, that lies between Mineral proper and Crystal. It has sometimes been called Quartz hill, though it is in reality a portion of Mineral, just as much as that section where the Midget is located is a portion of Gold hill.

So far, drifts have not been run on the ore, that which has been shipped being saved in the sinking of the shaft. It is the intention of the management to sink to the 200-foot point before the ore will be drifted on.

The ore has so far paid the expenses of mining, and the owners are highly pleased with the prospects for to them belongs the honor of opening the first pay mine on Mineral hill.

In addition, an ore that resembles a sand carbonate is being found in the Copperhead.

It is the heaviest ore that has been mined in the camp, and resembles a sulphide in every respect.

The ore is totally different from anything ever before mined in the district, and it would seem that those who have looked for values in that section have in reality passed over the ore. They have searched for one thing and have found another, and not recognizing it, have pitched it over the dump.

Several other plants are at work on the same vein which Swisher is working. ore has been opened, of the same grade, in another property. (Cripple Creek Times-Citizen.

Within the past two or three weeks there have been a number of filings under the Desert act, on land in Bostwick park. Every one is familiar with at least the name of this place, which is a beautiful plateau about seven miles above town over the first wooded hill on the road to the Gunnison canon. Some 2,000 acres or more have been taken up by different parties who also bought a good deal of stock in the Cimarron ditch which is distant from the park about seven or eight miles. It is proposed to get water on this land by building a lateral from this ditch, and when that is done the land will "blossom as the rose." It is rich, fertile and easily susceptible of cultivation, being a practically level tract. It would make a magnificent live stock ranch as several thousand head of cattle could be kept there, or it will divide nicely into fine crop ranches. This is one of the most extensive real estate deals resulting from the agitation of water enterprises and is an indication of the rush for land that is bound to take place as soon as it becomes more generally known that the Cimarron ditch is an assured reality. (Montrose Press.

A GEYSER.

Pagosa Springs Makes Strike of Hot Water.

The work of Mr. F. A. Collins has been crowned with success. About a year ago he came here a stranger, but not to a citizen of the town and section does he need an introduction now. That this community will reap rich rewards from the work, the foresight and the dogged perseverence of this young man is now certain.

From the day he put foot into the town he began examining the Springs formation, and sought by closest observation, to unravel the mysterious source of the famous hot springs which were intended for the use of mankind and not for the monopoly of man.

Mr. Collins could be seen at early dawn and when darkness was again gathering, climbing the steep and neglected river bank, among the rocks and brush. No one knew exactly what his motives were, and some even hinted that his conduct was strange and that a formerly brilliant mind was fast yielding to the ravages of insanity.

Later the town board was petitioned for a lease upon that part of the park where is located the site of a former spring, for boring purposes, and ample ground on which to erect a palatial hotel, bath houses and a sanitarium. The lease was granted, and later an old, worn out drilling machine put to work in the old spring site. The outfit was the sport of the idle and ridiculed by the expert oil drillers who are going down to rapids for oil.

In this way, with a spring pole, a depth of 50 feet was reached and only an artesian flow of cold soda water the result. The work was stopped and many thought the scheme was abandoned, but such did not prove to be the case.

Early one morning a derrick was raised, as if by magic, loads of pipe, old machinery, ante-dated pulleys, drills, an old reamer, scraps of cable and a horse power appeared on the ground. Mike Bender, Roy Rain and George Potter went to work. The machinery would not work, the tumbling rods tumbled into the river, the team ran away with the power. The broken fragments were fished out, put together, and, finally it was conceded that the "thing" might work.

Mr. Collins, in the meantime, had incorporated the Park Hotel, Bath & Hot Water company, and was selling stock. He had stocked an old spring crater, and a bubbling up of gas in the river bed. A heretofore unheard of scheme in the annals of incorporations, and one never before incubated in the fertile brain of the wildest promoter of the west.

Again people thought him crazy. The foolish ridiculed and the wise nodded. The drill was working, but was in cold water up to the necks of the workmen, for the hole was going down right in the river. Fires had to be built to warm up the machinery, and icicles hung from the well casing, in proud ridicule of the attempt being made to bring hot water from below.

The sulphur and mineral smell so characteristic of the mammoth spring across the river, floated across the bridge and it was said by some that the nearest approach to hot water that these struggling workmen would get would be a smell from the big spring.

The stock in the new company could scarcely be given away at first. A few had faith and bought stock, the work went on. On last Friday the first flow of hot water was struck; more sales were made. Saturday the stream raised above the platform; more sales of stock at 25 cents per share. Monday, more hot water. On Tuesday it was conceded that the original flow of a nice, powerful spring had been opened up and hot water was flowing barrels a minute. Stock was sold faster than it could be issued, and the price jumped from 25 cents to $1.00 per share, the par value.

The flow now is enormous, in fact is a regular geyser, and it is estimated that when cased the water can be raised from 25 to 30 feet. It has all the mineral appearance of the famous Pagosa springs. The temperature is of 160 degrees as it comes up through the cold river water, and will increase to over 150 degrees when the cold flow is cased off.

The Hotel company now has the water and the ground and will immediately take steps toward the erection of a fine hotel and bath house, which will meet the wants of the people and be in keeping with the growth and greatness of what Pagosa Springs is destined to be in the near future.

The theory upon which this problem has been so successfully solved is that the hot water flows from enormous depth through faults or fissures, and that in ages past the site on which the well has been put down was an active spring, whose throat has become closed by its own deposits of lime, and it only took the work of the drill to release the pent up waters and bring back the original flow.

The workmen have worked early and late, and, considering the many obstacles encountered and the poor machinery in use, they made wonderful progress.

While the entire community is rejoicing over the success of the enterprise, well knowing that the question of an abundant supply of hot water has been forever settled, no one forgets Mr. Collins, who conceived and carried out the plan.

From the day he came among us he has been in hearty sympathy with everything that would tend toward the upbuilding and growth of our city.

A man of staunch integrity, wide experience and the marvelous disposition to hang on forever or accomplish that which he undertakes, he has won for himself universal popularity. (Pagosa Springs Times.

THE FEAR OF HUMBUG.

Prevents Many People From Trying A Good Medicine.

Stomach troubles are so common and in most cases so obstinate to cure that people are apt to look with suspicion on any remedy claiming to be a radical, permanent cure for dyspepsia and indigestion. Many such pride themselves on their acuteness in never being humbugged, especially in medicines.

This fear of being humbugged can be carried too far, so far, in fact, that many people suffer for years with weak digestion rather than risk a little time and money in faithfully testing the claims made of a preparation so reliable and universally used as Stuart's Dyspepsia Tablets.

Now Stuart's Dyspepsia Tablets are vastly different in one important respect from ordinary proprietary medicines for the reason that they are not a secret patent medicine, no secret is made of their ingredients, although they are sold by all druggists under protection of trademark, but analysis shows them to contain the natural digestive ferments, pure aseptic pepsin, the digestive acids, Golden Seal, bismuth, hydrastis and nux. They are not cathartic, neither do they act powerfully on any organ, but they cure indigestion on the common sense plan of digesting the food eaten thoroughly before it has time to ferment, sour and cause the mischief. This is the only secret of their success.

Cathartic pills never have and never can cure indigestion and stomach troubles because they act entirely on the bowels, whereas the whole trouble is really in the stomach.

Stuart's Dyspepsia Tablets taken after meals digest the food. That is all there is to it. Food not digested or half digested is poison, as it creates gas, acidity, headaches, palpitation of the heart, loss of flesh and many other troubles which are often called by some other name.

Saved His Life.

"I feel I owe my life to Kodol Dyspepsia Cure," writes H. C. Chrestenson, Hayfield, Minn. "For three years I had dyspepsia so bad that I could hold nothing on my stomach. Finally I was confined to my bed. Doctors said I could not live. I read your advertisement on Kodol Dyspepsia Cure and thought it fit my case and commenced its use. I began to improve from the first bottle. Now I am cured and recommend it to all." Hefley-Arcularius Drug Co., C. E. Smith, 117 South Tejon street.

A GREAT RAILROAD ENTERPRISE is exemplified by the Union Pacific; a combination of palatial equipment, solid track, quick time and every convenience for solid comfort. Best route east or west. See your local agent or address E. R. Griffin, general agent, Denver.

PINNACLE LEASES MAIN WORKINGS

To the Lansing Leasing Syndicate Which Will Sink the Main Shaft an Additional 200 Feet at Once.

The directors of the Pinnacle Gold Mining company have just granted a lease on the main workings of the claim to the Lansing Leasing Syndicate, a strong company which proposes to do very thorough development work on the property. The lease stipulates for 20 per cent straight royalties, and a large amount of work each month.

The company has already started work, having installed a compressor plant, and the mines equipped with a good hoist and adequate boiler capacity. The lessees will immediately start sinking in the shaft which is now between 300 and 400 feet in depth, and accomplish 200 feet of additional sinking as soon as it can be done. It is expected that about $10,000 will have to be expended at the very outset.

The Lansing claim was worked very successfully at one time on company account, and a large amount of ore taken out. The shoot was lost some time ago, and efforts made to relocate it by the company, and by lessees, who have done desultory work, have been unavailing. The present company believes that by sinking the shaft to a good depth and then drifting in the vein, which is a very strong one, the chances for discovering the old ore shoot, or a new one, will be excellent.

The property of the Pinnacle company is located on Bull hill, adjoining the Isabella, and consists of a group of about 30 acres. Other claims are also owned by the company in different parts of the camp.

DOCTOR-JACK POT OFFICERS

Were Elected Yesterday---The Interests of the Woods Investment Company Were Recognized in the Choice.

The new board of directors of the Doctor-Jack Pot company met yesterday in this city and elected the following officers to serve the company for the ensuing year: President, A. E. Carlton; vice president, Warren Woods; treasurer, John H. Hobbs; assistant treasurer, H. E. Woods; secretary and general manager, F. M. Woods; assistant secretary, J. M. Allen.

The most important change is the election of Mr. Warren Woods as vice president of the company in the place of Mr. Stevenson, who, it is understood, is practically out of the company. Mr. F. M. Woods also assumes the duties of secretary as well as those of general manager.

The reports of the company which were read at the annual meeting in Cheyenne on Wednesday are now in the printer's hands, and when they are issued to the stockholders they will be given to the press. Although the company has been shipping a small amount of ore during the past few months, the record made, for the entire year is a very creditable one.

ABOUT THOSE MARKET LETTERS

The following communication was sent yesterday to the Gazette:

Someone who signs himself "Ipse" appears to have taken exception to parts of our last market letter, and while we cannot sanction his misrepresentations, yet we welcome the interest shown and trust that after all our last letter will be the means of "inculcating in all a more active and earnest effort to improve and better the mining stock business." It has always been our desire to arouse such interest and at last we feel that our efforts have not been in vain.

We regret, however, that the writer so modestly refrains from attaching his name to the article, but then we appreciate the advantage of his position, as it is so much easier to stab in the dark than in the light of day. If it is going to hurt the business to tell the truth, how much will be the injury to defend the untruth? It seems to us the best way to place the mining stock business on a firmer basis is to deal honestly and openly with ourselves, as well as the public, and if there are defects in the present system of dealing, it would be better to know them now, and the sooner the better. There is no advantage to continue living in a fool's paradise by throwing bouquets at ourselves when rotten eggs would suit us better. Homeopathic stock letters and sugar-coated pills may be easy to swallow, but they do not tend to relieve the sickness of the stock market.

We contended in our letter that if mining stocks are to receive any substantial support from the public, the many companies with but a small mineral area, will have to consolidate with other contiguous territory, thereby placing their stock on a higher plane, and relieving at the same time, the present congested state of the stock market. It is just as much to our interest as anyone to see an active and lively market, but are we to sit calmly by and see all other lines of business prosper except our own, waiting indifferently for something better to turn up? If we do, it is to be feared that we will do more than "go way back and sit down," but on the contrary, it will be a case of "In God we trusted, in Cripple Creek we busted." Keep up the good work, and may be we can "start something" yet.

Respectfully,
Delany & Delany.

MINING NOTES AROUND TOWN

A great deal of interest has been taken in mining circles in the matter of the tone of the different market letters sent out by local brokerage firms. Some letters are very optimistic, advising liberal purchases, while others are not so cheerful and sometimes even pessimistic. The letter which pas published in the Gazette yesterday morning signed "Ipse" was widely read, and a copy of it was posted on the bulletin board on the exchange, and 27 names were subscribed under it, indorsing the sentiments of the writer. The identity of "Ipse" has been the subject of much inquiry, but the writer seems to have kept his name a secret very carefully.

LESSEES ON PROGRESS HAVE HIGH ASSAYS.

The offices of the Progress Gold Mining company in this city have received information concerning the progress being made by Lessees Shafer and associates who are operating a lease on the Gold King claim of the company located on Gold hill. At a depth of 80 feet the lessees have commenced to save ore for a shipment. The vein from which the ore is being taken is from eighteen to thirty inches in width and the values run high. Assays show values as high as $2,250 per ton. In the rock from which this comes an abundance of free and rusty gold can be seen. The lessees and the management of the company are very highly pleased with the indications in the workings. A shipment is expected to be ready to be sent out about Wednesday of next week.

The other lessees who are working on this property have some very good showings and expect to make shipments soon.

INDICATIONS POINT TO LARGE DECEMBER OUTPUT.

The large tonnage that is being sent out by the mines of Cripple Creek for the first part of December is a good indication that the total output for the month of December will be the largest of any month of the year, and if it is it will be the largest output for one month that has ever been made in the history of the camp. There is being sent out to the mills and smelters a daily tonnage of 2,000 tons. All of the samplers of the district are crowded with ore and running day and night to keep up with the work. The Cripple Creek sampler which is the largest plant of its kind in camp handled 11,500 tons during the past month and Manager Fry now states that he expects that will be increased to 14,000 during the present month. The Taylor & Brunton, Rio Grande and Eagle samplers are being run at their fullest capacity. One of the reasons given for the increase in output is that the reduction in freight rates has made it profitable to handle more low grade ore.

The daily output from the Portland alone now amounts to from 10 to 13 broad gauge cars, or from 300 to 350 tons. The greater part of this is being shipped to a Denver smelter. Stratton's Independence, Gold Coin, Ajax and the Strong mines will also make a heavy output this month.

RETURNS FROM ZOE SHIPMENT WERE RECEIVED.

Returns were received yesterday by Best and Hanson who are operating a lease on the Zoe property from the shipment sent out by them on Sunday. The returns were somewhat below the anticipation of the shippers and this was due to a considerable extent because the sorting has not been done very carefully. The settlement was as follows: on five sacks amounting to 450 pounds, 33.64 ounces in gold or $672.80 per ton; screenings amounting to 14 tons went $60 per ton, while 18 tons of coarse rock that composed the remainder of the shipment ran $30 a ton.

This shipment was taken from the recent strike made in the 350-foot level. Work has been carried forward at the point where the strike was made during the present week and ore has been saved. A shipment of two cars is expected to be sent out on Monday and the lessees expect that the next consignment will show a considerable improvement in the value of the ore.

LESSEES ON RHINOCEROS NOW DOWN FORTY FEET.

The lessees on the Rhinoceros claim belonging to the Gould company have their shaft down to the depth of 42 feet. In the bottom of the shaft there is a foot of ore showing. The assays taken from the vein show returns of high values, running from 10 ounces to 50 ounces.

This shaft is one of the remarkable holes of the camp. At about one half its present depth very phenomenally rich ore was discovered and a shipment has been recently sent out that ran an average of $267.80 per ton for the 21 tons. Lessees Kerr Barton and associates who are operating the lease have sent out another shipment that ran 13 ounces to the ton.

MR. ISH SPEAKS OF TONOPAH DISTRICT.

After returning from Tonopah, Nevada to Cripple Creek, Mr. Ish has been in this city for a day or so. Mr. Ish in speaking of his trip stated that there appeared to him to be some very good opportunities for mining in the new Nevada district. He had gone there with the impression that all the properties were taken up, but after looking the ground over found a claim that was over a mile from the heart of the district and after doing some $40 worth of work upon it he sold it for $7,250. In speaking of the district Mr. Ish states that the producing area at present is about square. There are several good veins lying immediately adjoining the central district. Mr. Ish exhibited several specimens of ore that he brought back with him to the city yesterday much to the interest of those who saw them.

RECENT SHIPMENTS AND RETURNS FROM WORKINGS.

A 50-ton shipment from the Neville sub-lease on the Plato was closed yesterday. The ore is estimated to average about $40 a ton. Seven carloads were sent out Monday from the main lease operated by Judge Goddard. This consignment is estimated to be worth $35 a ton.

Kirk and associates, leasing on the Clara D of the Lexington company, are mining good ore, and recently closed a 20-ton shipment which they believe to be worth from $150 to $200 a ton. This is by far the best shipment ever sent out by lessees on this property.

A 20-ton shipment was sent out from the Burns, which is being worked by the Monarch Mining and Development company. The assays would indicate a value of about $80 a ton.

Returns were received Wednesday from a 12-ton shipment sent out from the Stonehouse lease on the Dillon on Battle Mountain, showing a settlement at the rate of $81 a ton. A 24-ton shipment from the adjoining block, under lease to Coughlin and others, brought $35 a ton.

Returns from 23 tons sent out last Saturday from the Jefferson mine by Lessees Hansen and Best gave values of $25 a ton.

To those who inspected the Mountain Boy during the last two weeks we say, come again. If you don't admit that we will soon have a mine and a big one, then we don't know one when we see it. You don't have to hurry that electric hoist will carry you down and up slowly if you wish. Everybody welcome. Call or write for modest little booklet about Mountain Boy, then show it to your broker and ask him if he knows of any stock quite so good for quick profit or safe investment. Our offices are on the ground floor and always in charge of one of the firm.

THE COLORADO SPRINGS MINING STOCK EXCHANGE

Colorado Springs, Dec. 12.—The mining stock market today was more active than it was yesterday, and prices were better in some instances, although there was still weakness apparent and a considerable amount of speculation. Trading in the mines was brisker, and the preferred prospects list also manifested some activity and a few fractional sales were recorded. In the mines list, Victor sold down to 50 and Elkton was in demand at $1.42½ during the day, but no good recovery was scored at the close, the stock selling at $1.43¼. El Paso also gained to 64¾ and Gold Dollar closed stronger at 10¾. Golden Cycle sold at $1, and Isabella at 33 and Portland was stationery at $2.85. Vindicator was a trader saddle at $1.24. This stock is very strong, probably because an extra dividend is anticipated. Cripple was firm and Mollie Dwyre, on a rumor of a Pointer consolidation, sold down to 2¾. Sedan was active at 4½, and Sunset-Eclipse sold up to 11¾. Zoe was a trader to the amount of 10,000 shares at 1¾.

EASTERN MARKETS

By Associated Press.

New York, Dec. 12. Speculative liquidation continued in the stock market today, induced by the stringency in money, which ran the call loan rate up to 12 per cent at one time and forced a good share of liquidation. Other selling was precautionary, in fear of still more stringent conditions in the money market. A very material element in the day's weakness was the short selling by the bears who became emboldened by the lack of support in the market and put out very large short lines. When the market turned, the bears found they had been following the decline too closely and they helped on the rally by bidding against each other to get back stocks. The rally came when the banks came into the exchange for the first time late in the day and offered large sums at the prevailing rate, which was at the high level.

With the satisfaction of the demand by these offerings the rate fell away and the pressure on the stock market was quickly relaxed. The dealings by the bears was the one element in the rally. This was not fully held and the market closed irregular. The few fractional advances which had been established on the rally were wiped out before the close and losses are shown practically throughout.

There is nothing obscure about the situation of the money market. With surplus reserves shown to be below $7,000,000 in last Saturday's bank statement and with large seasonable requirements for credits known to be impending, it was obvious that the money supply would be limited. The outgo of gold is continuing. In spite of the need for money, today showing a withdrawal of $500,000 from the sub-treasury for shipment on Saturday, said to be for Brazil. The renewed demand for the interior is also an unexpected development and was continued today with the transfer of $100,000 to New Orleans. The redemptions of government bonds are not sufficient to offset the requirements of the sub-treasury, as is shown by yesterday's net gain by that institution of $438,000, in spite of payment in redemption of bonds of upward of $1,500,000. Today's payment for the same account of over half a million, therefore, affords little relief from the drain upon the market on account of the routine sub-treasury operations. The available supply of government bonds for redemption has grown exceedingly scarce, and not much further relief is expected on that account. The anticipatory payment of government interest will not be available to the money market until next week. The speculative liquidation, both in stocks and grains, is presumably effecting some automatic relief to the money situation, but large sums which are taken out of the call loan market are placed in time loans, rates for which have advanced to 6 per cent for the shorter periods. The net effect upon the loan accounts of the banks is therefore problematical.

Besides the general influence of the money situation there was some special weakness shown by New York Central at a decline of 3% on account of the restriction of action by the directors of the Vanderbilt roads at today's meetings to an advance in the dividend rate on Canada Southern. Northwest dropped 4 and Omaha 6. Pennsylvania and Norfolk & Western fell over 2 points on account of the heavy outlays announced for the Hudson river tunnel and the belief in the purchase of the Pocahontas Coal company by the Norfolk & Western. A decline of 2½ in Manhattan led the weakness in the local tractions. Among the industrials Colorado Fuel fell 6¾ on rumors of dissensions in the corporation. General Electric lost 8, American Linseed preferred 5, and Tennessee Coal 2¾, without special explanation. The general range of declines ran from 1 to 2 points, Louisville at one time falling 2¾. The extreme losses were modified by the final rally. Amalgamated Copper fluctuated from a high level of 71¾c in the morning down to 67 in the afternoon, closing at 68¼c, a net loss of 2½c.

Bonds were active and weak. Total sales, par value, $5,545,000. United States bonds were all unchanged on the last call.

New York Money.

By Associated Press.

New York, Dec. 12. Money on call strong, 3@12; last loan, 5; ruling rate, 9; closed offered at 5. Prime mercantile paper, 4@5.

Sterling exchange weak, with actual business in bankers' bills at $4.86¾ for demand and at $4.82½@4.82¾ for 60 days. Posted rates, $4.83@4.84 and $4.87@4.87½. Commercial bills, $4.82¼@4.82¾.

Bar silver, 56. Mexican dollars, 43¾.

Bonds Governments, steady; state, strong; railroads, weak.

The Metal Market.

By Associated Press.

New York, Dec. 12. The feature of the metal markets today was the heavy selling of copper in London, which totaled 450 tons spot and 500 tons futures, and a loss of about £2 which puts both spot and futures on the basis of £52, 10s. This is the lowest price touched in London within the past three years. The New York copper market was dull with spot quoted at 16½@17; electrolytic, 16¾@16¾, and casting 16, all nominal. Tin prices were decidedly lower at home and abroad. The local break carried prices for spot delivery down to 24 and 25, representing the bid and ask prices. Spot was quite freely offered. London prices were £1, 5s lower, closing with spot at £102, 10s and futures at £102, 15s. Lead was quiet but unchanged here. London prices were 5s lower closing at £10, 10s, the lowest price in many years. Spelter was unchanged here at $4.45 and also in London at £16, 5s. Iron quiet. Glasgow closed at 56s, 2d and Middlesboro closed at 43s, 3d.

Coffee Market.

By Associated Press.

New York, Dec. 12. Coffee Spot Rio, steady; No. 7 invoice, 5 13-16; mild, steady; Cordova, 7¼@11.

London Market.

By Associated Press.

New York, Dec. 12. Commercial Advertiser's London financial cablegram: Disturbing elements in the stock market today were a fresh drop in copper to £52¼ the ton and in Rio Tintos to 41⅝ and the continued flatness of American stocks which failed to hold the opening prices, nervous bulls closing their contracts. New York came again as a seller but a rally toward the close on Amalgamated Copper dividend talk was only momentary. The close was at the bottom on private cable dispatches announcing dear money in New York. The Bank of England is still lending. Money is expected to be tight but the bank returns show that the reserve is £4,000,000 higher than a year ago at the same time, and therefore, nothing serious is anticipated. Gold to the amount of £2,000 has gone to the continent and the price of the metal has risen to 77s. 10d on the continental demand.

DAMON-JERRY JOHNSON SUIT

Extensive Preparations for Trial of the Apex Case---Another Shipment From the Rhinoceros to Go out Saturday.

Special to the Gazette.

Cripple Creek, Dec. 12.—Extensive preparations are being made for the trial of the apex suit which has been on for many months between the Damon and Jerry Johnson companies, owning property on the north slope of Ironclad. The Damon company has entirely suspended production for the time being, and nearly all attention is being given to examining the property in preparation for the hearing of the case. The injunction has tied up a valuable ore body for a long time, and all concerned are hoping that the case will be disposed of without any further trouble. A. P. Mackay is here from Denver with A. H. Boehmer, the well-known mining expert, in the interests of the Jerry Johnson company. The situation is being looked over very carefully by both parties to the suit, as there is a very valuable ore body at stake.

The lessees on the Rhinoceros of the Gould company, Messrs. May, Carlon and associates, will make another shipment from that Raven hill property on Saturday. The consignment will be the second since striking the rich body of ore, and will consist of between 20 and 25 tons. The operators do not look for as high returns as were received from the last lot, but at the same time are confident that the ore will bring in a big profit. The ore body is assuming a more permanent look, and the lessees are just beginning to get down into the good part of it at a depth of about 40 feet.

The Beacon Leasing company yesterday sent out three carloads of $25 ore to one of the district samplers. The company is operating block 10 of the Prince Albert property, and while the output at present is not ever large, the company is making better than expenses.

The Wilbur district south of Victor is attracting considerable attention from the fact that there are a good many parties prospecting this territory which looks to be very promising. A considerable quantity of rich rock was found in the locality of Mount Nipple in the early days. A great amount of work is being carried on just at present, and all of the prospectors seem to be encouraged by good indications met with in development.

The Dolly Mac G. M. Co., a New York corporation, has several men at work in driving a tunnel to catch a vein opened at surface where it yielded good values in float. The tunnel is now in about 200 feet and the vein should be cut within the next 10 feet. There are several well defined veins on this property which comprises about 10 acres.

Other operators working on the ground are getting assays indicating values of from $8 to $250 per ton, although so far there has not been a pay body opened.

The Murtel company, working over the Elkton dump, has commenced shipments which are to be steadily maintained from now on. The first carload of ore sent out looked to be of excellent grade, and there is little doubt that the men who took hold of this proposition will shortly begin to realize handsome profits.

Lessee Stevens, leasing the north end of the Golden Wedge of the Mary Jane company, on Raven hill, is doing some good development work, putting down a new shaft on the vein. The shaft has attained a depth of 40 feet, and an upraise is being run from the 100-foot level of the old workings to meet it, leaving about 60 feet of work to do before shipments can be resumed steadily.

A Christmas Present.

Anyone interested in Cripple Creek stocks will be delighted with the official manual of Cripple Creek. Give one to your friend for a Christmas gift. Price $1.00. The Gazette business office.

AUCTION

COLORADO SPRINGS AUCTION AND COMMISSION CO.—On Saturday, December 14, at 10:30, we will sell a lot of household furniture at our rooms, 10 S. Cascade. Daily and evening auction of men's furnishing goods, shoes, rubbers of all styles, blankets, etc. John Harris, Auctioneer.

THE TRUTH IN A NUTSHELL.

Mrs. Dashing—I see her husband has given her an automobile coat.
Mr. Dashing—Yes, but he had to sell his automobile to do it.

TO TRADE.

WILL YOU TRADE?

We have a 40-acre farm at Grand Junction; 25 acres of it is in fruit, just beginning to bear; the balance is the best of hay land; $40 worth of hay in stacks goes with the place, together with farming implements, horses, cows, etc.

Our proposition is this: We will trade this farm for Colorado Springs realty. If your property here is not worth as much as our farm we will take a mortgage on easy terms for the balance. See us quick about this; it is the chance of a lifetime to realize on your local realty at its full value.

FRANKLIN & JONES,
27½ North Tejon St.

TO TRADE For Colo. Spgs. property 5 acres orange grove, Redland, Calif. Address T. J. Lowther, Manitou.

LEGAL NOTICES.

Proposals For Books and Stationery.

Sealed proposals will be received by the Board of County Commissioners of El Paso County, Colorado, up to 4 p. m., Monday, December 30th, 1901, for furnishing said county for one year, commencing January 1st, 1902, with all books, stationery, records, printing, lithographing and incidental office supplies, specifically mentioning and describing them, as are used by the several offices of said county.

Each bid must be accompanied by a certified check of five hundred dollars as an evidence of good faith on the part of the bidder.

The successful bidder will be required to furnish a good and sufficient bond in the penal sum of ten thousand dollars.

Proposals must be addressed to the undersigned and endorsed, "Proposals for Books, Stationery, etc."

The Board reserves the right to reject any and all bids.

Specifications will be furnished upon application to the Clerk of the Board.

By order of the Board of County Commissioners.
(Seal.) W. H. Reed,
County Clerk.
December 9, 1901.

Proposals For County Advertisements.

Sealed proposals will be received by the Board of County Commissioners of El Paso County, Colorado, up to 4 p. m., Monday, December 30th, 1901, for publishing the County Advertisements for one year beginning January 1st, 1902.

PROPOSALS MUST CONTAIN—

First:—The price per inch, nonpareil type, set solid, for printing the delinquent tax sale list once a week for not less than four weeks.

Second:—The price per line for all miscellaneous advertisements for daily and weekly editions for first and each subsequent insertion, 12 lines per inch, solid.

Third:—The price per inch for publishing the County Clerk's semi-annual reports in daily and weekly, or either, for first and each subsequent insertion.

Bidders must agree to certain specifications as to form and style furnished by the proper officers of said County.

Bidders will be required to file with proposals a statement under oath, setting forth the circulation of their respective newspapers within the County of El Paso for the month of December, 1901, stating the number of issues in such circulation. All bids must be accompanied by a certified check of five hundred dollars payable to the order of the undersigned as an evidence of good faith on the part of the bidder. A good and sufficient bond in the penal sum of five thousand dollars will be required of the successful bidder. Proposals must be addressed to the undersigned and endorsed "Proposals for Advertising."

The Board reserves the right to reject any and all bids.

By order of the Board of County Commissioners.
(Seal.) W. H. Reed,
County Clerk.
December 9, 1901.

Proposals For Burial of Paupers.

Sealed proposals will be received by the Board of County Commissioners of El Paso County, Colorado, up to 4 p. m., Monday, December 30th, 1901, for the burial of deceased county paupers for one year, commencing January 1st, 1902. Coffins to be good and substantial, made to order of dry inch pine, sound lumber, planed on both sides, well put together with nails or screws, and covered with black cloth. Corpse to be buried in some public cemetery in a proper manner upon notification by the Superintendent of the Poor or Superintendent of County Hospital.

Bidders will state price of each coffin and burial complete.

Proposals must be addressed to the undersigned and endorsed "Proposals for Burial of Paupers."

The Board reserves the right to reject any and all bids.

By order of the Board of County Commissioners.
(Seal.) W. H. Reed,
County Clerk.
December 9, 1901.

LEGAL NOTICES.

Colorado Springs, Colo., Nov. 9, 1901.
To the Stockholders of the Gold and Globe Hill Mining Company:

Notice is hereby given that a special meeting of the stockholders of the Gold and Globe Hill Mining Company will be held at the office of the company, No. 2 East Pike's Peak avenue, Colorado Springs, Colo., on Saturday, the 14th day of December, 1901, at 10 o'clock a. m. for the following purposes:

I. A resolution will be offered and voted upon to reorganize the Gold and Globe Mining Company under the laws of Wyoming, with a capital stock of one million shares ($1,000,000) of the par value of one cent (1c) per share, making the entire capital ten thousand dollars ($10,000), and of this amount seven hundred and fifty thousand ($50,000) shares will be issued to the stockholders of the Gold and Globe Hill Mining Company in exchange for the seven hundred and fifty thousand shares which they now hold in the old company; each stockholder to receive an equal amount of the stock in the new company for their holdings in the old. The remaining two hundred and fifty thousand ($50,000) shares will be placed in the treasury of the new company to be used for development purposes, as the directors may from time to time determine.

II. A resolution will be offered and voted on authorizing and directing the president of the Gold and Globe Mining Company to convey and transfer all its assets, consisting of both real and personal property, to the new company which shall be known as the Gold and Globe Hill Consolidated Mining Company, and to receive therefor 1,000,000 shares of the stock of the new company.

We would suggest that you forward your proxies in due time, to the end that there may be as full a representation as possible at the stockholders' meeting on the 14th day of December, 1901.

By order of the board of directors.
L. L. Aiken, Secretary.

To the Stockholders of the Gold Dollar Mining Company:

You are hereby notified that, pursuant to action of the board of directors, a special meeting of the stockholders of this company is hereby called to be held on Monday, the 16th day of December, 1901, at the hour of 12 o'clock noon, at the office of the company, No. 109 East Pike's Peak avenue, Colorado Springs, Colo.

The object of said meeting is to advise the stockholders of, and submit for their consideration the final action of the directors of this company taken under the authority vested in them by its articles of incorporation and the statutes of Colorado respecting the transfer of all its property, assets and effects to a company to be incorporated under the laws of the state of Wyoming, to be called the Gold Dollar Consolidated Mining company; and for the further purpose of submitting for the consideration of the stockholders the question of winding up the affairs of this company and its dissolution.

Books for the transfer of stock will close on Wednesday, the 11th day of December, 1901, at 3 o'clock p. m., and will remain closed until three days after the final adjournment of said meeting.

C. F. Collins, Asst Sec'y.
J. S. Tucker, President.

NOTICE OF STOCKHOLDERS' ANNUAL MEETING.

Notice is hereby given that the annual meeting of the stockholders of the Acacia Gold Mining Company, for the election of directors and for the transaction of such other business as may properly come before the meeting, will be held at the office of Hundley & Miller, suite 7, First National Bank building, Colorado Springs, Colo., on Tuesday, December 17, A. D. 1901, at 10 o'clock a. m.

Books for the transfer of stock will close on December 12, 1901, at 4 o'clock p. m., and reopen one day after the final adjournment of the meeting.

By order of the board.
William D. Sargeant, Sec'y.
Colorado Springs, Colo., November 12, 1901.

NOTICE OF STOCKHOLDERS' MEETING.

The regular annual meeting of the stockholders of the Exchange National bank of Colorado Springs, Colo., for the election of directors and the transaction of other legitimate business, will be held in the banking house of said bank, on the 9th day of January, 1902, between the hours of 11 o'clock and 2 o'clock p. m. of said day. A. G. Sharp, Cashier.

Proposals For Coal.

Sealed proposals will be received by the Board of County Commissioners of El Paso County, Colorado, up to 4 p. m., Monday, December 30th, 1901, for furnishing said county with coal for one year commencing January 1, 1902.

Bids will state the price per ton for the various kinds, Bituminous, Anthracite and Lisbite Coal, clean, well screened and free from slate. To be delivered at such times and to such places and in such quantities as the Board may direct within the City of Colorado Springs.

Proposals must be addressed to the undersigned and endorsed "Proposals for Coal."

The Board reserves the right to reject any and all bids.

By order of the Board of County Commissioners.
(Seal.) W. H. Reed,
County Clerk.
December 9, 1901.

STOCKHOLDERS' MEETING OF THE ST. THOMAS GOLD MINING COMPANY.

Saturday, December 14th, at 10 o'clock a. m., at the office of D. N. Heizer, 16 North Nevada Avenue.

Colorado Springs, Colo., Nov. 12, 1901.

Notice is hereby given that the annual meeting of the stockholders of the St. Thomas Gold Mining Company will be held at the office of the company, 16 North Nevada avenue, Colorado Springs, Colo., upon Saturday, December 14, 1901, at 10 o'clock a. m., for the purpose of electing a board of directors for the ensuing year and for the transaction of such other business as may properly come before said meeting. Books for the transfer of stock will close Tuesday, December 3, 1901, and reopen immediately after the final adjournment of said meeting.

You are earnestly requested to be present in person or to send a proxy to someone who will represent you at said meeting.

The St. Thomas Gold Mining Company.
D. N. Heizer, Secretary.

NOTICE.

To Whom It May Concern:

We will sell at the Colorado Springs Mining Stock Exchange, Saturday, December 21, 1901, 500 shares of the Gould Mining and Milling company stock and 500 shares of the Monarch Gold Mining and Milling company stock. We will also sell in front of the El Paso county court house, at 12:30 p. m. the same day, 1,000 shares of the Mt. Rosa Mining, Milling and Land company stock, the same having been pledged with us to secure payment of note made by Powell Bros., July 15, 1901, and now overdue.

Partridge & Storer.

SLEEPING CAR SERVICE
BETWEEN
COLORADO SPRINGS AND CRIPPLE CREEK
VIA THE SHORT LINE.

Under new schedule, Cripple Creek sleeper from Denver, arrives Colorado Springs at midnight, leaving for the camp at 2:35 a. m. over The Short Line. Sleeping car and coaches ready for occupancy at midnight, arriving Cripple Creek 6:10 a. m., but passengers may remain in the cars undisturbed until a late hour. This service will be an accommodation to local patrons who are unable to leave on the afternoon train. The Short Line's unequaled passenger service of four trains each way a day between Colorado Springs and the Cripple Creek district is pleasing the people into Victor.

75 cents to Cripple Creek by the Colorado Midland railway.
